**REBUTTAL ARGUMENT**

BY MR. LAMKEN
BY MR. JANDA
BY MR. FREDERICK

1 THE COURT: Welcome this afternoon. We have In re  
2 LTL Management LLC, Numbers 22-2003, 2004, 2005, 2006, 2007,  
3 2008, 2009, 2010, and 2011. And in connection with the oral  
4 arguments today, I had told counsel previously that we would  
5 probably go a bit longer than the two hours. That said, once  
6 upon a time, we had an oral argument we started in the morning  
7 in a case called Combustion Engineering and we went from about  
8 9:30 until about 5:30, 5:45 and I didn't realize we didn't -- I  
9 was reminded years later that we only took two 15-minute  
10 breaks, which was not fair.

11 Seth Waxman argued and he told me that and somebody  
12 was with him at the time. Now, Judge Craig Goldblatt said that  
13 is exactly right. And I didn't realize that Mr. Waxman doesn't  
14 eat on the day of oral argument. And so in the afternoon, one  
15 of my law clerks was feeling a little faint and went and got  
16 some M&Ms, and she's sitting over there and she looks at  
17 Mr. Waxman and Mr. Waxman looks at her and they both go, open  
18 their hands and each had M&Ms in their hands. So I've learned  
19 my lesson.

20 What we will do is we will not go past five o'clock  
21 today and we will take a break after the first hour so that  
22 everybody can get some time to regroup. And also if somebody  
23 wishes to have a break sooner than that, just give me a little  
24 bit of a high sign and we'll go from there.

25 And with that, why don't we begin with Mr. Lamken.

1 And I've promised Mr. Lamken and Mr. -- come on up --  
2 Mr. Katyal that similar to what the Supreme Court has been  
3 doing the last few years, will have two minutes of  
4 uninterrupted time at the beginning of your argument.

5 MR. LAMKEN: Thank you, Your Honor. May it please  
6 the Court. If I may reserve 15 minutes for rebuttal.

7 THE COURT: You certainly may.

8 MR. LAMKEN: For more than a century, companies  
9 facing genuine financial distress have done what companies like  
10 Johns-Manville did. They submit themselves and their assets to  
11 the bankruptcy court and to the Code's requirements and  
12 creditor protections. This is an effort to do the opposite.  
13 In LTL's words, to put talc-related claims through the  
14 Chapter 11 reorganization without subjecting the rest of the  
15 assets of JJCI to bankruptcy procedures and to enjoin suits  
16 against 670 non-debtors, including affiliates, even though they  
17 have independent non-derivative liability. That subverts at  
18 least four different core bankruptcy principles.

19 First, if J&J or JJCI had declared bankruptcy,  
20 priority rules would require creditors to be paid in full  
21 before equity gets anything. But here, J&J and JJCI operate  
22 outside bankruptcy with Old JJCI's assets, paying billions in  
23 dividends to equity, to shareholders. Last week, J&J announced  
24 a \$5 billion stock buyback, more for equity. But talc victims  
25 alone are mired in bankruptcy as they die.

1 Old JJCI's trade creditors are compensated in the  
2 ordinary course, but the disfavored creditors, talc victims,  
3 sit languishing in bankruptcy. A clear subversion of the  
4 priority rules that ordinarily apply is hard to imagine.

5 Second, debtors-in-possession management ordinarily  
6 have a powerful incentive to try and emerge from bankruptcy as  
7 quickly as possible so they can get on with their ordinary  
8 operations free from bankruptcy supervision. But here, J&J and  
9 JJCI, the tortfeasors funding all of this, have no such  
10 interest in swift emergence. They operate Old JJCI's assets  
11 outside of the Bankruptcy Code free and clear of bankruptcy  
12 court supervision, paying who they want while talc claimants  
13 alone are in bankruptcy.

14 LTL has no incentive. It exists only for bankruptcy,  
15 no operating business, no transactions to engage in. You need  
16 only look at the three other two step bankruptcies to  
17 understand exactly what happens to these incentives. Before  
18 bankruptcy, for example, Bestwall had resolved 15,000 asbestos  
19 claims. Now, five years in, not one claimant has received  
20 compensation from bankruptcy. We have no approved plan and all  
21 the official committee representatives alive at the case's  
22 outset have passed away. Worse, the delay benefits LTL and  
23 JJCI and Johnson and Johnson as talc victims can only get more  
24 desperate. They can only get more likely to cave each day they  
25 face unreimbursed medical expenses and they get closer to their

1 own deaths.

2 THE COURT: Is your principle argument that there is  
3 not a proper bankruptcy purpose or that the debtor here is not  
4 in financial distress or what?

5 MR. LAMKEN: So the answer is it's not a proper  
6 bankruptcy purpose because evading Bankruptcy Code principles  
7 is not a valid bankruptcy principle. As this Court pointed out  
8 in SGL, those who seek relief in bankruptcy have to comport  
9 with the underlying Bankruptcy Code principles. And when the  
10 bankruptcy is established for the very purpose of evading the  
11 ordinary bankruptcy procedures --

12 THE COURT: And by the ordinary Bankruptcy Code  
13 principles, you mean what?

14 MR. LAMKEN: I mean, for example, what I started out  
15 with, which is the priority rules. This is structured so that  
16 all the dividends, all the equity can be paid while one  
17 category of claimants, talc creditors, sit in bankruptcy and  
18 don't get paid. Another principle is that you have to have  
19 incentives to come to the bankruptcy to come forward with a  
20 reasonable plan in order to emerge swiftly. But the opposite  
21 is true when you take all the operating assets, all the  
22 businesses, and you can operate them outside bankruptcy and the  
23 only people who are mired in bankruptcy are the talc claimants.

24 THE COURT: Are you referring to economic relief for  
25 the victims?

1 MR. LAMKEN: Yes. Yeah, that's exactly right. And  
2 the ordinary principle is under the absolute priority rule, the  
3 ordinary rule is no equity gets paid until creditors are paid.  
4 And we have the exact opposite going on here.

5 THE COURT: How was that economic relief  
6 appropriated?

7 MR. LAMKEN: I'm sorry, Your Honor.

8 THE COURT: Is that economic relief delivered to the  
9 victims?

10 MR. LAMKEN: So in the ordinary tort system, the  
11 victims bring their lawsuits and they either settle or they go  
12 to trial and they get relief. But they're allowed to proceed  
13 and try and seek that compensation through the system that 50  
14 states have used for two centuries to compensate victims of  
15 misconduct. But right now --

16 THE COURT: So you're saying bankruptcy does not  
17 allow that to happen?

18 MR. LAMKEN: Well, bankruptcy delays it while we're  
19 going through all the plans and trying to come up with it. And  
20 right now, if you look at how it works when you have these two-  
21 step bankruptcies, it goes for Bestwall, five years with nobody  
22 getting compensated, no plan, and everybody dying in the  
23 meantime. By contrast, if you don't separate it -- people  
24 have, if you don't separate your liabilities and put them off  
25 into one entity, an artificial entity with just these talc

1 liabilities and you instead have the people with liabilities  
2 and the actual companies in bankruptcy, then there's an  
3 incentive to go forward and come up with a plan so people  
4 actually get compensated and get compensated promptly because  
5 management wants to emerge from bankruptcy. But right now,  
6 there's no incentive actually to do that for J&J and JJCI  
7 because they're operating Old JJCI's assets, famous brands of,  
8 you know, Tylenol and the like, free and clear of bankruptcy's  
9 requirements.

10           Instead, the only ones who are sitting in bankruptcy  
11 are the talc claimants. They pay their ordinary trade  
12 creditors, no problem. Pay them as the money comes due. Only  
13 the talc claimants sit in bankruptcy. And it's just in essence  
14 like SGL where you've just taken one set of creditors and put  
15 them at a disadvantage, talc victims, and everybody else  
16 proceeds as before.

17           THE COURT: If LTL were formed in 1979 to hold the  
18 talc products, so instead of it going to baby products, it goes  
19 to LTL and LTL operated for a number of years but now is in the  
20 process of doing, in effect, an orderly liquidation, would you  
21 have a problem?

22           MR. LAMKEN: So I think that the issue we have in  
23 terms of evading the structure of the Bankruptcy Code and all  
24 the principles of Bankruptcy Code, that would be a very  
25 difficult argument to make because once you take an entity and

1 you operate it and you have a legitimate business purpose for  
2 the structure that the entity has and you're operating it for a  
3 number of years, then it has a legitimate non-bankruptcy  
4 purpose. Where you cross the line is, where two days before  
5 you declare bankruptcy, you do a divisive merger in order to  
6 put the talc claimants into bankruptcy alone and take the  
7 assets, the operating businesses, the valuable brands of that  
8 former company and put them outside bankruptcy, and it's solely  
9 for the purpose to ensure that talc claimants are treated one  
10 way and all the assets are outside the bankruptcy. When you do  
11 that two days before bankruptcy, I think that clearly crosses  
12 the line.

13 THE COURT: It sounds from what you're saying is,  
14 you're saying it would be a different argument. But it sounds  
15 like if they had done that in '79 and ran the company for a  
16 number of years, ultimately decided they couldn't go forward,  
17 do a liquidating 11, it would be an acceptable bankruptcy  
18 purpose in that particular circumstance. Is that correct?

19 MR. LAMKEN: So I would not be able to argue today  
20 that this is an evasion of bankruptcy purposes because clearly  
21 it was done for a purpose, not evading bankruptcy. It was done  
22 because that was a logical way to operate the business in 1979.  
23 It was operated --

24 THE COURT: So, and then you're saying at the other  
25 end of the spectrum, what they did by forming on October 12,

1 2021, filing two days later, it doesn't work. Where is the  
2 line that is crossed in your view?

3 MR. LAMKEN: So I think the line is when the sole  
4 purpose is not a legitimate business purpose of this is a  
5 logical way to operate the company, but the sole purpose is to  
6 disrupt, to subvert, to frankly, pervert the Bankruptcy Code,  
7 to evade its ordinary principles, I think that crosses the  
8 line. And here --

9 THE COURT: What do we make of the timing here? And  
10 what I mean by the timing is, is I understand that about four  
11 months after the Supreme Court denied cert in Ingham, LTL is  
12 formed and shortly thereafter, the day after -- they file for  
13 bankruptcy shortly thereafter. What do you make of the timing  
14 here?

15 MR. LAMKEN: So, Your Honor, I think the timing is  
16 clear that in essence, J&J had felt failed and they said this,  
17 "We felt failed by the tort system." And so they went to  
18 another system they thought would be more favorable. They went  
19 to bankruptcy. But the problem is, if they want to evade the  
20 tort system and move to bankruptcy, if they have financial  
21 distress, and I know that's disputed, and if they have a  
22 legitimate purposes, that's fine. But they also don't want to  
23 actually face the usual bankruptcy rules because rather than  
24 just taking, we have a distressed tortfeasor, JJCI or J&J, and  
25 we'll put it into bankruptcy, which is the ordinary way of

1 doing it. That's how it was done in Johns-Manville. That's  
2 how it's been done for 200 -- well, 100 years since we've had  
3 something like a Chapter 11.

4           Rather than do that, they did something fancy and  
5 they said we're going to take the talc claimants alone.  
6 They're going to go into bankruptcy by themselves and they're  
7 the only creditors that will be stuck in bankruptcy. The  
8 assets, these businesses that are producing valuable goods with  
9 famous names, those are going to stay outside bankruptcy and  
10 that subverts everything that bankruptcy supposed to do.

11           In fact, if I go to the third point is that, you  
12 know, the usual rule in bankruptcy is the bankruptcy court has  
13 supervision over the debtor's operations to make sure those  
14 operations are working for creditor benefit to enforce  
15 fiduciary duties towards the creditors. But if you look at  
16 Appendix Page 4463, J&J has now announced it's actually going  
17 to spinoff its consumer products division, effectively spinning  
18 off JJCI.

19           Now, if J&J or JJCI had declared bankruptcy, the  
20 bankruptcy court, under Section 363, would have authority over  
21 that non-ordinary course. Creditors like the talc claimants  
22 would then be able to have notice and an opportunity to be  
23 heard. But because they've shifted everything to a new entity  
24 and they've only put an artificial entity, a concocted made-  
25 for-bankruptcy entity into bankruptcy, none of those

1 protections apply. There's no ability for the bankruptcy court  
2 to look and say, yes, you're spinning off JJCI. Let's make  
3 sure that we put everything in escrow. Let's make sure we do  
4 something to make sure that all those funds are available for  
5 the creditors for whom they should benefit.

6 THE COURT: Your concern is principally for the talc  
7 victims. Is that --

8 MR. LAMKEN: Absolutely, Your Honor.

9 THE COURT: And your suggestion, if I'm not mistaken,  
10 is to take them out of bankruptcy. Is that --

11 MR. LAMKEN: Pardon me?

12 THE COURT: To take those talc victims out of  
13 bankruptcy. They should not be subject to the --

14 MR. LAMKEN: That's right.

15 THE COURT: -- bankruptcy requirements?

16 MR. LAMKEN: Because this is not a good faith  
17 bankruptcy, because the purpose of the bankruptcy by its terms  
18 is to evade the usual bankruptcy requirements, the bankruptcy  
19 should be dismissed.

20 Now, there's a second question --

21 THE COURT: So it's a bankruptcy to avoid bankruptcy?

22 MR. LAMKEN: Pardon?

23 THE COURT: It's a bankruptcy to avoid bankruptcy.  
24 Is that what you're saying?

25 MR. LAMKEN: This is exactly what it is. It's a

1 bankruptcy designed to avoid the purposes and principles of  
2 bankruptcy. It's been gerrymandered in a sense so as to place  
3 only one class of creditors at risk.

4 THE COURT: You were mentioning the second question,  
5 but let me ask you. If we come to the conclusion this was not  
6 done in good faith, this is a bad faith filing, do we need to  
7 get to the second question on the stay?

8 MR. LAMKEN: No, Your Honor, because the mandatory  
9 requirement under 1112(b) is if it's not, if there is cause,  
10 the Court must dismiss. It says it shall dismiss. So if this  
11 is not good faith, the standard and only remedy is dismissal.

12 Now, there is an unusual circumstances exception, but  
13 there's requirements that have not been met. One of them is  
14 that there was good cause or good justification. And there's  
15 simply no good justification for a bad faith bankruptcy. And  
16 second is that there has to be a cure in a reasonable period of  
17 time. And I think when the entire bankruptcy is structured so  
18 that talc victims are on their own in bankruptcy and all the  
19 other creditors are outside bankruptcy, when the structure is  
20 set up so that talc victims are in bankruptcy but all the  
21 assets are outside bankruptcy, there's no cure there that some  
22 would come up with and I don't think the bankruptcy court ever  
23 suggested there could be a cure.

24 THE COURT: If you were in the shoes and you call it  
25 Old JJCI, I'd probably just called for the sake of people here

1 in the audience, Old Consumer. So you have Johnson and  
2 Johnson, Johnson and Johnson Consumer which took over baby  
3 products. So Consumer doesn't go in, it keeps the other items  
4 like, you know, Aveno, Tylenol, et cetera, and you separate  
5 out -- it's like good bank, bad bank back in the late '80s when  
6 you had -- come in on a Friday night and you separate  
7 everything out and you open the bank up on Monday.

8 In light of the verdict in the Ingham case, which I  
9 think surprised a lot of people, even though it was ultimately  
10 reduced, what would you have advised to do if you were  
11 representing J&J Consumer?

12 MR. LAMKEN: So I think my answer would be the answer  
13 that all the companies have confronted for a long time, which  
14 is if you're genuinely in financial distress, you can take your  
15 company into bankruptcy. If you're not genuinely in  
16 bankruptcy, excuse me, in financial distress, then you may  
17 continue your fight. Yes, you got a bad result in Ingham, but  
18 look, after Ingham, what did J&J tell it's investors. After it  
19 was denied, it said the facts were "unique and the case is not  
20 representative." That's at Appendix 4 -- excuse me 4404.

21 After the denial in Ingham, what did they tell the  
22 investors, that liabilities were "not expected to have a  
23 material adverse effect on the company's financial position."  
24 Appendix 4506. And what did it tell the Court about -- what  
25 did LTL tell the Court? It reiterated that there was in light

1 of the liabilities, "no likely need of the debtor to invoke the  
2 funding agreement," so that's supposedly \$61 billion to its  
3 maximum amount or anything close to it." That's at  
4 Appendix 3747.

5 This is probably the first planned major bankruptcy,  
6 at least the first I've ever heard of, where if you're looking  
7 for indicia of financial distress, you don't find any business  
8 executive, you don't find any documents at J&J or JJCI before  
9 the bankruptcy saying, "Wow, we're financially distressed.  
10 We're heading for insolvency." The first time you see that is  
11 in the bankruptcy and where is it coming from? It's coming  
12 from the lawyers.

13 THE COURT: When you look at financial distress, are  
14 you looking at Old Consumer and LTL or just LTL?

15 MR. LAMKEN: So I think that the proper answer since  
16 we're -- if we indulge the facade that LTL as a legitimate  
17 entity to put into bankruptcy, and mind you --

18 THE COURT: You'll have to raise your voice just a  
19 tad when you --

20 MR. LAMKEN: Pardon?

21 THE COURT: Raise your voice just the tad, sir.

22 MR. LAMKEN: Yes.

23 So if we indulge the notion, one that I wouldn't  
24 accept, that it's okay to take LTL and put LTL into bankruptcy,  
25 I think the answer is you have to look at LTL's liabilities

1 because that's the chosen one, the one they've chosen, and you  
2 would ask, can LTL -- is it suffering financial distress?

3 This case is live by the LTL, die by the LTL.  
4 They've chosen to designate something LTL, claim it's a  
5 separate entity, push it into bankruptcy with just the talc  
6 victim claimants. Well, then you're looking for financial  
7 distress, you're going to just look at LTL.

8 THE COURT: But I thought your initial concern was  
9 the optics aren't right in breaking off and keeping out of  
10 bankruptcy Good Company, while putting into bankruptcy Bad  
11 Company with the liabilities.

12 MR. LAMKEN: That's exactly right, Your Honor. And  
13 that's why if you're going to indulge the notion, but that's  
14 the key thing.

15 THE COURT: Doesn't that sound as if you're taking  
16 Old Consumer into account? It's almost like, I kept wondering  
17 why somebody didn't file like a fraudulent conveyance action.

18 MR. LAMKEN: So, Your Honor, you know, down the road,  
19 if we're legitimately in bankruptcy, there are remedies for  
20 certain individual transgressions. But the fact that there are  
21 remedies down the road for individual transgressions doesn't  
22 make an otherwise bad faith bankruptcy a good faith bankruptcy  
23 to begin with. Good faith is a threshold requirement at the  
24 outset.

25 When the entire structure of your bankruptcy is

1 designed to evade traditional bankruptcy requirements,  
2 traditional priority rules, supervision over spinoffs, all the  
3 things that courts do to make sure that the money is there for  
4 creditors. When it's designed to do that, well, it's just not  
5 a good faith bankruptcy. You don't even get to something like  
6 a fraudulent conveyance.

7 THE COURT: Let me go back to financial distress and  
8 litigation for a minute. Opposing counsel makes much of the  
9 fact that there are 38,000 plus claims being filed, or have  
10 been filed and more coming with respect to the talc litigation,  
11 can fear or the cost of this litigation qualify as financial  
12 distress?

13 MR. LAMKEN: So, Your Honor, I don't think the  
14 supposed efficiency of bankruptcy counts. I think the Court  
15 has said that in cases like SGL, that that isn't, thinking that  
16 you're going to be more efficient in bankruptcy, doesn't count.  
17 But even so, that still doesn't tell you whether or not it's --

18 THE COURT: Not so much more efficient, but less  
19 exposure. Or is the exposure the same?

20 MR. LAMKEN: Yeah. So I think, Your Honor, the  
21 notion that if one is going to be in financial distress, that  
22 is the threshold. You need immediate financial distress. The  
23 notion that you can just reduce your liabilities from yay to  
24 lower isn't a sufficient basis. And so the real question is,  
25 looking at LTL, or if you want to indulge fiction and go back

1 to JJCI as the bankruptcy court do, was there legitimate  
2 financial distress that they were not going to be able to make  
3 their payments, that they really had a need to go into  
4 bankruptcy, which is powerful medicine. People don't get paid.  
5 Forty thousand cases around the country get stayed. That's  
6 powerful medicine. You have to have some significant showing  
7 there, and we don't think they got there.

8 But even apart from it, if there is financial  
9 distress, that just reinforces my first point which is, if  
10 there's financial distress, that's all the more reason you want  
11 the traditional bankruptcy protections to be in place. If  
12 there's financial distress, you don't want money going --

13 THE COURT: But it sounds like what you're saying,  
14 you want the traditional bankruptcy protections to be in place  
15 for Old Consumer.

16 MR. LAMKEN: Exactly. Exactly. Because if Old  
17 Consumer and, you know, as LTL's telling us, you know, even --

18 THE COURT: But you just said that you're looking  
19 primarily at LTL in connection with this case and Old Consumer  
20 is kind of off to the side.

21 MR. LAMKEN: So we would for financial distress look  
22 to LTL. But remember, what is supposedly funding this  
23 bankruptcy? It's an unsecured funding agreement backed by J&J  
24 and JJCI. So if they face legitimate financial distress,  
25 there's every reason to be worried about not supervising what

1 they're doing, every reason to believe that they shouldn't be  
2 paying equity ahead of injured talc victims.

3 THE COURT: Well, if you're a claimant, isn't the  
4 only thing that you're really concerned with is that they pay  
5 up as to what they say they'll pay up for?

6 MR. LAMKEN: No, Your Honor. I think who gets paid  
7 first is critically important. If I am left waiting my turn as  
8 people are passing away, that's very different than the  
9 absolute priority rule where equity doesn't get paid until I'm  
10 paid first. That's a hugely different endeavor. It's entirely  
11 different in terms of the incentives, as I pointed out. Why is  
12 J&J and JJCI going to push this through bankruptcy if they can  
13 continue paying equity, if they can spinoff divisions without  
14 bankruptcy court supervision? If they continue their  
15 operations just as before, then there's no reason for them to  
16 push this through. And LTL has no reason to push this forward  
17 and have a reasonable plan because they're made for bankruptcy.  
18 They have no assets, no operations --

19 THE COURT: So you're saying is through the backdoor,  
20 equity is coming out whole. Whereas, if it had been Old  
21 Consumer in bankruptcy, the absolute priority rule would've  
22 played out differently.

23 MR. LAMKEN: It may well be, Your Honor, but we don't  
24 have to guess at an answer because the rules are there to make  
25 sure that happens. And we don't just -- and we don't set aside

1 the rules and say, well, we're going to play monkey business  
2 with the absolute priority rule and allow this elaborate scheme  
3 where you take one set of claimants out because it might work  
4 out in the end. There's no sort of it might work out in the  
5 end exception to the absolute priority rule where you get to  
6 pay equity as you go and certainly not without consent,  
7 certainly not without a bankruptcy court supervising what's  
8 going on. That's what we count on the bankruptcy courts for.

9 THE COURT: What's your thought about individuals who  
10 may be exposed but the exposure is not really realized until  
11 years, years down the road?

12 MR. LAMKEN: Right. And so look, first, you know, if  
13 we're worried about the interests of future claimants, future  
14 claimants would be as much protected by a JJCI bankruptcy as an  
15 LTL bankruptcy. That just simply doesn't answer whether or not  
16 you should take this concocted made-for-bankruptcy entity and  
17 put it in bankruptcy with just the talc claimants alone. If  
18 bankruptcy serves future claimants better --

19 THE COURT: Your suggestion is that all these cases  
20 should be out of bankruptcy?

21 MR. LAMKEN: Pardon?

22 THE COURT: Your suggestion is that all of these  
23 cases should be out of bankruptcy?

24 MR. LAMKEN: That's exactly right.

25 Everybody should be treated the same. Either all the

1 creditors are in bankruptcy or all the creditors are out.

2 Either all the assets are in bankruptcy or all the assets are  
3 out of bankruptcy. And that's for future --

4 THE COURT: I assume that would protect people who  
5 were exposed years down the road. They would not be subject to  
6 bankruptcy, of course. But they would be protected.

7 MR. LAMKEN: Yes, they would have their claims as  
8 they come up and as they realize they're injured.

9 And look, this is not the first mass tort that has  
10 something of a tail to it where people end up getting sick over  
11 time at later in time. There's lots of mass torts like that.  
12 There was Vioxx from Merck. There's the diet drugs litigation.  
13 These things happen and the tort system has ways of handling  
14 them.

15 Now, if there is other reasons and a legitimate basis  
16 for going into bankruptcy, well, bankruptcy has ways of  
17 handling it too. But concern for future claimants is not  
18 itself a reason for bankruptcy. And there's a little bit of an  
19 irony here that we have Johnson and Johnson asserting that it's  
20 concerned about future claimants when its position in this  
21 litigation is that there was no asbestos, no one was injured,  
22 this is just a matter of a litigation lottery and no one should  
23 receive anything.

24 If we really are interested in the interests of talc  
25 claimants, listen to the talc claimants. There's just not one

1 here telling you that they'd rather be in bankruptcy, that they  
2 really don't want be in the tort system that 50 states have  
3 used for nearly 200 years.

4 THE COURT: Well, let's assume we find or come to the  
5 conclusion that it was a good faith filing. What do we do with  
6 the stay? Did the bankruptcy court exceed its jurisdiction?

7 MR. LAMKEN: So I think the bankruptcy court did  
8 exceed its jurisdiction because even if one assumes that LTL is  
9 a proper debtor, and that's our debtor, that has consequences.  
10 And that means when you're looking at 362 and an automatic  
11 stay, that applies to the debtor. And what the bankruptcy  
12 court did here is it stayed over 670 actions against over 670  
13 non-debtors, including debtors that have their own independent,  
14 own tortious conduct, non-derivative liability, and that just  
15 exceeds its jurisdiction.

16 And to get there, the district court, or excuse me,  
17 the bankruptcy court looked at two things. It talked about  
18 mostly supposedly shared insurance and indemnification  
19 agreements. But the key finding on that is on Appendix 159  
20 where the court accepts, I'm quoting, that "Any claim of shared  
21 identities of interest is based solely on the allocation of  
22 agreements to the debtor on the eve of bankruptcy," and here's  
23 the cure part, "for the very purpose of extending the stay."

24 The court, in essence said, look, even though the  
25 purpose of this indemnification agreement which we allocated to

1 LTL, even though the purpose of having shared insurance was to  
2 extend the stay, that's a good enough reason to give a stay to  
3 companies like Johnson and Johnson that have their own tortious  
4 conduct. And that's just error twice over.

5 Combustion Engineering makes it very clear that  
6 contrived agreements for purposes of creating jurisdiction just  
7 can't be given that type of weight. Because otherwise,  
8 jurisdiction can be created by consent.

9 THE COURT: What's the usual way that you would argue  
10 that there is jurisdiction?

11 MR. LAMKEN: For non-debtors?

12 THE COURT: For a stay under 362 that would affect  
13 non-debtors, correct.

14 MR. LAMKEN: So the usual way you would find that is  
15 if you found something that's akin to an identity of interest  
16 where, if there's liability by the non-debtor, that is  
17 automatic liability for the debtor. And no ability of the  
18 bankruptcy court to intervene and say, yes, I know the non-  
19 debtor is liable, but I'm not going to let it dissipate the  
20 assets of the debtor. So --

21 THE COURT: And in that context, is it core  
22 jurisdiction or is it by virtue of arising under or arising in?  
23 Or is it related to jurisdiction?

24 MR. LAMKEN: So I think the better answer is to  
25 adhere to the text of the statute, which says only the debtor

1 for 362(a)(1), actions against the debtor, literally. When you  
2 go to --

3 THE COURT: But we know what courts tend to do,  
4 practically speaking. They tend to use 105 and they say, we're  
5 going to extend it because there is this "identity of interest"  
6 or there is insurance that's being paid out for the non-debtor  
7 that would likely be also covering the debtor itself.  
8 Therefore, you don't want to dissipate the insurance so  
9 therefore, you fit under 362(a)(3) and we're going to combine  
10 the two, (a)(1), (a)(3), along with 105, and go from there.  
11 And it looks like a lot of courts just tend to deal with it  
12 practically.

13 I was just looking for some cases and we found one by  
14 Judge Posner on the Seventh Circuit. You know, it says, no, it  
15 wasn't all that much analysis, it's the right thing to do.

16 MR. LAMKEN: Yeah, and I think the right-thing-to-do  
17 theory really is relying on 105 because 105 is sort of the  
18 necessary and proper clause that says, "Well, it's necessary  
19 and proper." But 105 doesn't create its own jurisdiction. You  
20 have to go find jurisdiction under another provision of the  
21 Bankruptcy Code. And the problem with 105 is, and here in  
22 particular is, you'd have to have the necessary findings in  
23 order to invoke it and the findings just are absent.

24 For example, for indemnification, the ordinary rule  
25 is it has to be automatic indemnification. If you need another

1 lawsuit for the indemnification to occur, as under Federal-  
2 Mogul and W.R. Grace, if you need another lawsuit, then it  
3 doesn't count for 105 because the bankruptcy court can  
4 intervene when the other lawsuit is filed against the debtor.  
5 And there's simply no finding, and I think LTL concedes this on  
6 Page 96, that LTL would certainly face "automatic indemnity  
7 obligations." And so it just falls short under W.R. Grace and  
8 under Federal-Mogul.

9           And second, even apart from the fact that these are  
10 all either the bankruptcy indemnifications for the purpose of  
11 establishing jurisdiction, the 1979 JJCI agreement, that can't  
12 really establish even for Old JJCI an indemnity obligation  
13 because that covers only liabilities that are allocated on the  
14 books or records of J&J as pertaining to its baby division but  
15 there were no type liabilities in 1979 allocated to Old JJCI at  
16 that point. And it doesn't really expressly indemnify J&J for  
17 its own tortious misconduct and to indemnify a company for its  
18 own tortious misconduct, you typically have to have language  
19 regarding fault, negligence, culpability, something like that  
20 in there. There's no language like that in the 1979 agreement.

21           Finally, I see my red light is on --

22           THE COURT: That's fine. You're on our time.

23           I'd like to go into what the benefits and detriments  
24 are in considering a 524(g) channeling injunction or trust, if  
25 you will, versus the mass tort system because we've had a lot

1 of *amici* file briefs one way or the other.

2           The theme seems to be of the debtor that the 524(g)  
3 trust can be set up. It's adequately funded along with the  
4 claims coordinator already in place. The claims coordinator  
5 has a proven track record of ferreting out valid claims from  
6 invalid claims and you can do estimations and everything can be  
7 resolved in one single venue. And their point is, what's wrong  
8 with that?

9           MR. LAMKEN: All right.

10           So first, I think you don't get to a remedy like  
11 524(g) until you have a legitimate good faith bankruptcy in the  
12 first place and so that would not solve our problem with the  
13 lack of good faith, the fact that we've hived off one set of  
14 creditors, talc victims, for differential treatment, the fact  
15 that we've taken the actual assets of the entity and put them  
16 outside bankruptcy.

17           But one of the problems here is that 524(g) has been  
18 distorted by that as well. Look, for a 524(g) trust, the idea  
19 is you take the debtor's securities and you put them in the  
20 trust with a right to dividends, it says that in the statute,  
21 so that you have sort of that ongoing evergreen source of  
22 funding so you can keep coming up with more assets to pay  
23 future claimants. What this court in a footnote referred to or  
24 quoted Congress as saying that you have a goose that can "lay  
25 golden eggs and continuously fund those victims."

1 But what happened here is, because we swapped out  
2 debtors from J&J and added somebody with an actual operating  
3 business, Famous Brands, to somebody who's just a made-for-  
4 bankruptcy entity, you've swapped out a very different goose  
5 and it's a goose that doesn't lay golden eggs. It just is a  
6 goose with a right to have a funding agreement. It's an  
7 unsecured funding agreement, subject to defenses, and that's  
8 just inconsistent with Combustion Engineering which says on  
9 Page 248, it says, look, implicitness is that you need an  
10 ongoing operating business.

11 And that's reinforced by Section 524(g) (2) (B) because  
12 that says that you could only have this sort of 524(g) trust  
13 when your debtor was named in litigation at the time of the  
14 bankruptcy. And that forecloses the idea of having --

15 THE COURT: But that seems to be hyper literal in  
16 this case because in the end, the LTL I think probably already  
17 has been named in cases, has it not?

18 MR. LAMKEN: No, Your Honor. I don't think it's  
19 hyper literal in the following sense because it serves an  
20 important purpose. Congress wants the real tortfeasor, the  
21 real guy who has an operating business to be the one operating  
22 the 524(g) trust because then his securities go into the trust.  
23 By requiring somebody who would've been named when they  
24 declared bankruptcy, it ensures that you have a real company  
25 there, not a made-for-bankruptcy debtor like LTL that has no

1 real operations and it has no assets --

2 THE COURT: But we have a real company and  
3 liquidating 11s are allowed, and specifically, Integrated  
4 Telecom tells you in Footnote 4 that oftentimes you have  
5 liquidating 11s and, in my day, we had quite a number that were  
6 filed in the 80s, or at least in the 90s all the time.

7 MR. LAMKEN: So, Your Honor, you know, it's possible  
8 that if you had a consensual plan, people could agree to having  
9 something like LTL be putting it securities, whatever those  
10 might look like, in a 524(g) trust. I don't think it's  
11 consistent with the statute, but one could conceive of it. But  
12 this deprives the claimants of that choice, right? Now, the  
13 debtor that would put its securities in it is LTL, this made-  
14 for-bankruptcy entity that doesn't have operating divisions.  
15 And everything that it's guaranteeing, everything that is, you  
16 know, sort of pledged in some sense that, you know, there's an  
17 there's an unsecured funding agreement, all those assets are  
18 now being spun-off by J&J and won't even be assets there until  
19 it's funded anymore. So I think it just completely upsets the  
20 whole idea of 524(g) of taking the debtor's actual securities.

21 THE COURT: But what would be the best approach? I  
22 mean, there are a lot of heartbreaking stories here and it's  
23 very difficult to come up with a right game plan for everybody.  
24 From your perspective, what would be the best approach --

25 MR. LAMKEN: I think --

1 THE COURT: -- for these very difficult cases, these  
2 talc related disabilities?

3 MR. LAMKEN: So I can speak from my perspective and  
4 my clients. And from my perspective and my clients, they are  
5 happy to go forward with the traditional tort system that has  
6 operated in this country to compensate people for 200 years.  
7 But if --

8 THE COURT: How long would that take?

9 MR. LAMKEN: Your Honor, I don't know how long it  
10 would take, but I know that these things do move very quickly.  
11 For example, you know, Judge Robreno downstairs, 186,000 talc  
12 resolutions, Vioxx resolved, diet drugs resolved. The tort  
13 system can handle these mass torts. This is not the first.  
14 But that also doesn't in the end tell you, what are you going  
15 to have? Is it okay to just go have a JJCI bankruptcy or even  
16 to allow there to be this concocted entity, LTL, with only talc  
17 victims, no other creditors and all of Old JJCI's assets  
18 sitting outside bankruptcy. That goes too far.

19 THE COURT: But I think that -- I mean, part of what  
20 Judge Fuentes is asking is which system is better, the MDL  
21 system or the bankruptcy system, for resolving these types of  
22 claims in an orderly way and getting money as quickly as we can  
23 to people with valid claims?

24 MR. LAMKEN: So under this structure, I can tell you  
25 there's a clear answer and it's the tort system, because if you

1 look at Bestwall, when you separate the assets and the ability  
2 to operate from the bankruptcy system, when you take only the  
3 talc claimants, only the victims and put them alone in  
4 bankruptcy, bankruptcy bogs down and you go five years without  
5 a plan, without anybody getting compensated. Before that --

6 THE COURT: But with Bestwall, it has been five  
7 years. But in this case, we don't know. If bankruptcy is  
8 found to have a valid purpose here and it goes back, I don't  
9 know when it's going to be over. But it does seem, based on  
10 what some people have filed, that MDLs take a long time.

11 And well, perhaps you can have Bellwether Trials.  
12 Most of what you do is discovery. You send it back to the  
13 other courts. You hope to somehow at some point you can get a  
14 settlement discussions going, but that also can take many  
15 years.

16 MR. LAMKEN: Your Honor, I agree that no system is  
17 perfect here. But we're the ones looking for compensation and  
18 we're happy to be in that system, which can sometimes be slow,  
19 but it can also move very quickly as the examples I gave you  
20 show.

21 But in the end, I don't think courts should be in the  
22 position of saying I think bankruptcy is better because it's  
23 more efficient or I think tort is better because it's more  
24 consistent with other values like having jury trials and  
25 individual justice. I think that the answer is if you have a

1 bankruptcy that has been structured to bypass the traditional  
2 bankruptcy protections, which is what you have here, that is  
3 not a good faith bankruptcy. If the purposes are to benefit  
4 the parent, the corporate parent, which is the case here, that  
5 is not a proper bankruptcy.

6 THE COURT: So in your world view, any equities with  
7 respect to which system is better or worse shouldn't be baked  
8 into the equation?

9 MR. LAMKEN: I don't think that is because it comes  
10 very, very close, Your Honor, to litigation advantage, who  
11 thinks which system is better.

12 Is this better for the victims? Is this better for  
13 the defendant or the petitioner? That's just not someplace the  
14 court should be. And one of the reasons for that is you kind  
15 of in the end have to ask more efficient, better for whom. And  
16 in this case, if you look at it, there's supposedly \$61 billion  
17 available for funding.

18 THE COURT: I mean, the problem if you're a claimant  
19 is it looks like in a lot of these cases you either get a home  
20 run or a strikeout.

21 MR. LAMKEN: Well, I think the framers understood  
22 that juries can sort those sorts of things out. And if you get  
23 a strike out, it may well be because the jury determined that  
24 you didn't have specific causation, that whatever your  
25 condition is, it was caused by something else. And that's --

1 THE COURT: Well, Mr. Feinberg could probably do that  
2 much more quickly and much more efficiently than having a full  
3 blown trial.

4 MR. LAMKEN: Well, Your Honor, I think that's right.  
5 But the Seventh Amendment tells us that if you want your jury  
6 trial, you're entitled that jury trial. And the framers  
7 understood that the community, the people of the United States  
8 who sit in the dark and make the decisions, we trust them to  
9 sort those things out. And the fact that some people win and  
10 some people lose, we trust that the juries are able to sort  
11 that out. And the notion that somehow bankruptcy may be more  
12 efficient, that's just not a good basis for having a bankruptcy  
13 case because in the end, even if it's more efficient, who for  
14 is it more efficient and who is it benefitting?

15 Here, if there's anything under \$61 billion that's  
16 ultimately distributed in this bankruptcy, and believe me, when  
17 a plan is proposed by J&J, when that happens, if it happens,  
18 it's going to be well short of 61 billion. Anything short of  
19 that, all those efficiencies, all that extra, that accrues to  
20 equity. This is not more efficient for claimants. It's more  
21 efficient and better, perhaps, only for equity.

22 If I may reserve any remaining time for my rebuttal.  
23 I thank you very much.

24 THE COURT: We'll give you plenty of time for  
25 rebuttal.

1 MR. LAMKEN: Okay. If there are further questions,  
2 then I'm happy to entertain them.

3 THE COURT: I've got quite a few, but we'll come  
4 back.

5 MR. LAMKEN: Okay. I'll brace myself here.

6 THE COURT: Why don't we get Mr. Frederick, or I  
7 guess Mr. Janda --

8 MR. LAMKEN: Thank you very much.

9 THE COURT: -- and then, we'll get you back.

10 MR. JANDA: Thank you, Your Honor. And may it please  
11 the Court. Sean Janda for the United States Trustee.

12 I think it's helpful to start by just taking a step  
13 back to understand what's really happening here. At bottom,  
14 J&J has carved off one set of disfavored creditors claims, hand  
15 picked a selection of assets, and sent only those claims and  
16 only those assets into bankruptcy. If that carefully  
17 constructed bankruptcy is permitted to proceed, those claimants  
18 will be held hostage against each other with no claimant  
19 receiving any money until enough claimants agree to take  
20 whatever drips LTL chooses to release from the spigot of the  
21 funding agreement.

22 THE COURT: I'm going to ask you a variation of the  
23 question I asked of Mr. Lamken. Let's assume, instead of 1979,  
24 that LTL was formed 2010 when the first cases really started  
25 coming, or maybe 2014 when they saw that the cases were for

1 real. And so you had good assets, bad assets, LTL gets the  
2 liabilities in connection with the talc. So let's, it's now  
3 been since 2014, let's say eight years, would you still be  
4 objecting if LTL now filed for bankruptcy in 2022, 2021?

5 MR. JANDA: So I think there's two different pieces  
6 here, Your Honor. The one piece is the sort of value of your  
7 organizational purpose piece, whether there's assorted  
8 financial distress that makes bankruptcy a legitimate choice.  
9 And then the other piece is the sort of subverting the  
10 structures and purposes of the Code.

11 And on the second piece, you know, I think it's hard  
12 to say exactly where the line is. In this case, the fact that  
13 this scheme was implemented two days before the bankruptcy  
14 filing was enacted, it's very obvious --

15 THE COURT: I get it. You're saying the optics  
16 aren't good here, but I'm trying to -- you're writing an  
17 opinion here. Where's the line?

18 MR. JANDA: And I think, as Mr. Lamken said, the line  
19 is whether these machinations or the scheme was undertaken to  
20 try to subvert the principles of the Bankruptcy Code. And so  
21 it might be the case that if it happened in 2014 with  
22 bankruptcy on the mind, that might be enough. It might be the  
23 case that if it happened in 2014 with sort of valid business  
24 purposes on the mind, it wouldn't be enough. It's hard to give  
25 a very clear line.

1 But this case I think very obviously falls on one  
2 side of the line. And I don't think the Court needs to say too  
3 much more than that to find that this sort of integrated  
4 transaction very much undermines sort of a number of  
5 fundamental purposes and structures of the Code.

6 THE COURT: Where we left off with Mr. Lamken was the  
7 reasons to have a 524 channeling trust versus the mass tort  
8 system. Do you have any thoughts on that?

9 MR. JANDA: I mean, I think the most important thing  
10 is, with all respect to the Court, that's not really the  
11 Court's job to make the determination about which system is  
12 more equitable or which system is fairer or better. That's  
13 Congress's job. And Congress has created the 524(g) process  
14 that sort of assumes a preexisting valid bankruptcy. And once  
15 you are in bankruptcy, Congress has determined that in certain  
16 clearly defined circumstances, a 524(g) trust might be the best  
17 resolution in those circumstances.

18 Congress has also implemented, you know, the MDL  
19 procedures and other procedures to try to make the resolution  
20 of mass claims more efficient, the balance, the competing  
21 interests in that circumstance. But the overarching thing is  
22 that Congress has determined that the strong (indiscernible) in  
23 the Bankruptcy Code is necessary or is appropriate in certain  
24 circumstances, and really I think the sort of job of the Court  
25 is to figure out whether those circumstances are met, not to

1 figure out whether at the end of the day one system or the  
2 other system is better or fairer or more efficient.

3 THE COURT: Can the fear of a lot of litigation, tens  
4 of thousands of cases and huge jury verdicts, can that satisfy  
5 this financial distress concern?

6 MR. JANDA: So it depends on the particular  
7 circumstances. I point the Court to SGL Carbon which has a  
8 very long discussion of this. In SGL Carbon, the test that  
9 this Court implemented was sort of an immediate financial  
10 difficulty test and so it could be the case that litigation  
11 fees or judgments that had been entered are such that there is  
12 immediate financial difficulty. But this Court in SGL Carbon  
13 sort of specifically rejected the idea that the prospect even  
14 of financial and operational ruin from a judgment, at some  
15 point in the future, is not to satisfy that test.

16 And in this case, as we explain in our briefs, I  
17 mean, LTL had access to the \$61 billion funding agreement  
18 before bankruptcy. I don't think anyone is going to stand up  
19 here and tell you that there was any immediate concern that the  
20 \$61 billion would be exhausted, that it wouldn't be enough to  
21 satisfy judgments in the short term or to pay the litigation  
22 costs in the short term. And so just under the SGL Carbon test  
23 that this Court implemented, LTL was not in financial distress.  
24 But --

25 THE COURT: When you consider financial distress, I

1 asked Mr. Lamken, do you consider Old Consumer and LTL or just  
2 LTL? And he answered LTL, initially. What do you say?

3 MR. JANDA: So I think this Court, again, has made  
4 clear and Congress has made clear that really bankruptcy is  
5 intended to benefit the debtor. And the debtor here is LTL.  
6 And to the extent that LTL, you know, wants to take advantage  
7 of carving off this set of claims, I think it has to, as  
8 Mr. Lamken suggested, if it's going to live by the sword, it  
9 has to die by the sword in that way.

10 And LTL I think narrowly focused (indiscernible) and  
11 as I said, no one would tell you, I don't think, that LTL was  
12 in any sort of immediate financial difficulty. That being  
13 said, if you zoom out, the question might be --

14 THE COURT: But wouldn't the argument be that LTL is  
15 in financial difficulty, it's just that here it happens to have  
16 a very, very big backstop, two backstops, in fact, Old Consumer  
17 and Johnson and Johnson?

18 MR. JANDA: I don't think so, Your Honor. I mean,  
19 the rights under the funding agreement give it access so long  
20 as it's not in bankruptcy. I mean, the money sort of  
21 disappears as soon as it files for bankruptcy but give it  
22 access when it's not in bankruptcy to \$61 billion. And to the  
23 extent that as the bankruptcy court suggested that LTL  
24 exercising its rights under that agreement, would have negative  
25 effects on J&J or on Old or New JJCI, and I think that just

1 goes to the concern that this bankruptcy is primarily intended  
2 to benefit non-debtors who have not submitted themselves to the  
3 supervision of the bankruptcy court, who haven't complied with  
4 the obligations of the Code, and that as this Court made clear,  
5 BEPCO, just not a valid bankruptcy purpose.

6 THE COURT: So there were some very, one could argue  
7 on one side, far out projections by the bankruptcy judge here  
8 as to what the potential liability can be or the range of  
9 liability, I think at one point, up to 190 billion, which is  
10 significantly more than the \$61 billion backstop as provided by  
11 Johnson and Johnson and Old Consumer. In that case, would LTL,  
12 if that's true, would LTL be in financial distress?

13 MR. JANDA: No, Your Honor. And I think -- so the  
14 briefs obviously make clear that there are a lot of assumptions  
15 baked into that number that are not necessarily valid or  
16 supported. But even assuming it's true, and SGL Carbon makes  
17 clear that the test is not all of your potential liability or  
18 all of your potential costs sort of stretching out into the  
19 future, it's whether there's immediate financial difficulty.  
20 And no one is contending, I don't think anyone's going to get  
21 up here and tell you that there was that sort of immediate  
22 financial difficulty with LTL.

23 THE COURT: So the key word used in SGL Carbon was  
24 premature and your point here is, at this point in time, today,  
25 it would be premature for LTL to say it's in financial

1 distress?

2 MR. JANDA: Correct. And I think SGL Carbon makes  
3 clear that it's not just because it's premature but because in  
4 some ways it's speculative, right. You don't know how suits  
5 are going to turn out. You don't know what costs are going to  
6 be in the future. If you have an operating business, it is  
7 sort of --

8 THE COURT: I think it's just another way of saying  
9 premature. I can speculate but it's not, we don't know.

10 MR. JANDA: Correct. But I think thinking about it  
11 as speculation helps explain why the bankruptcy court's  
12 findings on this are really problematic because they are  
13 speculation. They're based on assumptions that are not  
14 necessarily supported and that, you know, may or may not turn  
15 out to be true. But certainly, there's nothing that justified  
16 in the short term the invocation of the strong protections of  
17 the Bankruptcy Code.

18 THE COURT: Well, let's assume we reverse the  
19 bankruptcy court, what would litigation look like going forward  
20 and does J&J have any direct liability?

21 MR. JANDA: So my understanding, Your Honor, and  
22 we're obviously not involved for the most part in the tort  
23 cases. My understanding is that at least some of these  
24 judgments have been entered against J&J directly whether sort  
25 of that's appropriate, whether there will be more, I have no

1 idea. You know, I think if this Court concludes that the  
2 bankruptcy petition should have been dismissed, at that point,  
3 J&J or JJCI sort of, or LTL merged back into new, I mean, who  
4 knows what would happen, they could make a decision whether  
5 they wanted to continue in the tort system or whether they  
6 thought that they were facing the sort of financial difficulty  
7 JJCI to justify invoking the protections of the Bankruptcy  
8 Code.

9           At that point, they would submit themselves, all of  
10 their assets to the supervision of the bankruptcy court and  
11 would comply with the Code's obligations. And, again, that's  
12 just sort of fundamentally really the problem here is Congress  
13 has given very strong protections to entities facing financial  
14 difficulty and has determined that sort of the shield of those  
15 protections is necessary and is appropriate in circumstances  
16 where the person or the entity taking advantage of them submits  
17 itself to the Code, submits itself to the bankruptcy court,  
18 complies with the many obligations of the Code.

19           But here, I think sort of LTL or J&J is trying to  
20 turn what should be that shield of bankruptcy into a sword by  
21 not complying with any of the obligations and by trying to get  
22 sort of full resolution indefinitely into the future without  
23 undergoing any of those obligations that Congress has  
24 determined are required.

25           THE COURT: Is the biggest concern that the U.S.

1 Trustee's Office has that the optics of this just don't seem  
2 normal for the type of bankruptcy that is allowed by the Code  
3 in America?

4 MR. JANDA: So I don't think this is about the optics  
5 of this, Your Honor. It's about just fundamental subversion of  
6 the Code. I mean, the U.S. Trustee cares very deeply about the  
7 structure and the integrity of the Code. And here, I mean, as  
8 we explained in our briefs and I'm happy to go through the sort  
9 of transaction, the scheme here, just undermines --

10 THE COURT: So let me try it another way.

11 LTL has existed for a number of years. LTL has  
12 massive liabilities in connection with and potential  
13 liabilities in the future, suits being filed every day, with  
14 regard to its talc products. When can LTL be safely assured  
15 that there won't be an objection of the Trustee if LTL files  
16 for bankruptcy protection?

17 MR. JANDA: And with apologies, I don't think I can  
18 give you an answer that you're going to find satisfactory on  
19 that. I have no idea what in sort of other circumstances the  
20 Trustee would or would not decide to object to. I mean, the  
21 key here and we don't think LTL was in financial stress. We  
22 don't think there's a valid reorganizational purpose. We've  
23 made that clear. But I think the biggest problem from the  
24 Trustee's perspective is the subversion of the Code, is the  
25 sort of playing games with these really fundamental, important

1 rules of the Code. And to the extent that a particular  
2 bankruptcy wasn't doing that, I think the Trustee's interest --

3 THE COURT: And just to sum up, the most important  
4 rules of the Code in your view are?

5 MR. JANDA: And I think we will focus on three  
6 things. One is the priority rules that creditors and equity  
7 holders have to be treated in a particular way. Equity doesn't  
8 get anything until creditors are paid. And here, equity has  
9 been getting stuff all along while creditors languish in  
10 bankruptcy.

11 Two is the idea that, I mean at its core, the Code  
12 sets up a fundamental quid pro quo where an entity submits  
13 itself to a lot of obligations of the Code and the supervision  
14 of the bankruptcy court in exchange for the Code's protections.  
15 And here, that's just not (indiscernible).

16 THE COURT: It sounds to me like you're talking about  
17 Old Consumer, you're not talking about LTL.

18 MR. JANDA: So, Your Honor, I think there's sort of  
19 two things here. And one is, to the extent that the Court  
20 wants to focus sort of just on LTL --

21 THE COURT: No, but I'm just following along with  
22 your answer.

23 MR. JANDA: I mean, I think the point is that LTL has  
24 filed for bankruptcy I don't think anyone would disagree to  
25 benefit JJCI, to benefit J&J, and those sorts of benefits to

1 non-debtors are just not contemplated by the Code. The Code is  
2 for debtor who submit itself to its obligations and the point  
3 of this bankruptcy isn't to benefit LTL, it's to benefit the  
4 non-debtors who haven't submitted to the Code's obligations,  
5 who haven't done the sort of financial disclosures, who haven't  
6 had the supervision of the bankruptcy court, who won't have the  
7 supervision of the bankruptcy court. And that's just not an  
8 appropriate purpose for the very strong medicine the bankruptcy  
9 court provides truly distressed entities, which again, LTL was  
10 not at the time that it filed.

11 THE COURT: And any other bankruptcy principles that  
12 you think are violated. You mentioned two.

13 MR. JANDA: And then, I mean the third one I think is  
14 sort of in with the second one is the idea that in addition to  
15 complying with the obligations of the Code, it's the debtor  
16 submits itself to the supervision of the bankruptcy court and  
17 sort of ensures that it's acting in a way to maximize creditor  
18 returns. And here, again, J&J, JJCI just haven't submitted to  
19 that supervision. So that, to the extent that it's separate  
20 from the second regarding sort of the various other obligations  
21 of the Code that J&J and JJCI are not themselves compliant.

22 THE COURT: If tort litigants prefer to have their  
23 day in Court, doesn't it seem wrong that Old JJIC can decide  
24 otherwise by taking advantage of the bankruptcy system?

25 MR. JANDA: I think that depends on the particular

1 circumstances, Your Honor. I mean, obviously --

2 THE COURT: I think that was a softball.

3 (Laughter)

4 MR. JANDA: Well, so Congress has constructed the  
5 Bankruptcy Code and Old JJCI might well be able to file for  
6 bankruptcy and might well have been able to take advantage of  
7 Congress' protections even in the face of objections from tort  
8 claimants. I think in this case, obviously, tort claimants are  
9 being uniquely disadvantaged relative to equity holders and  
10 relative to J&J's other creditors. And that's something that's  
11 just not contemplated by the Code or by, I mean, anything else  
12 that Congress has done. I'd say Congress has established  
13 procedures for resolving mass tort litigation, even mass tort  
14 litigation that involves substantial liability and has  
15 determined that those procedures best balance the relevant  
16 interests in the context of mass tort.

17 THE COURT: Thank you very much.

18 MR. JANDA: Thank you.

19 THE COURT: We'll hear from Mr. Frederick and then  
20 we'll take a break after that.

21 Welcome.

22 MR. FREDERICK: Thank you, Your Honors. And may it  
23 please the Court, David Frederick for the Arnold and Itkin  
24 appellant. I'd like to reserve three minutes of time for  
25 rebuttal.

1 I'd like to emphasize two points in my presentation.  
2 The first is that your cases, Third Circuit cases, should  
3 compel reversal. BEPCO, SGL Carbon, and Integrated Telecom,  
4 all set out the appropriate tests for determining what is good  
5 faith in a bankruptcy. In this situation, LTL fails the  
6 relevant tests for financial distress and good faith in  
7 promoting a bankruptcy. And I'd like to go into that in a  
8 minute.

9 But my second point is that there is no limiting  
10 principle to LTL's position. They cannot tell you when any  
11 other corporation would be constrained from doing exactly what  
12 they have done, not just for a mass tort, but for any  
13 significant liability. Johnson and Johnson is a company with a  
14 market capitalization of half trillion dollars that throws off  
15 dividend income for its shareholders at the rate of \$10 to \$11  
16 billion a year, that boasts that for 59 straight years, it has  
17 increased its dividend.

18 And so if Johnson and Johnson can get away with  
19 filing a bankruptcy to hive off its tort liabilities for talc  
20 claimants, what's to stop any other company in America from  
21 doing the same thing?

22 THE COURT: It sounds to me like you're saying is if  
23 the backstop, instead of 61 billion for these types of claims  
24 were, pick a number, 5 billion, then wouldn't LTL be in  
25 financial distress enough that it should be able to take

1 advantage of the bankruptcy system?

2 MR. FREDERICK: Well, I think that you go through the  
3 normal test, Judge Ambro, and one of the reasons why I think my  
4 colleagues have resisted this hypothetical, which I think  
5 you're searching for where is the line to draw.

6 THE COURT: Right.

7 MR. JANDA: And I think that the answer to that is  
8 that you're going to have to assess was there a good faith  
9 purpose and emphasize is the LTL in your hypothesized construct  
10 an ongoing concern? Because one of the purposes of a  
11 Chapter 11 is to take a business that has an ongoing economic  
12 value and preserve and help through the bankruptcy rules that  
13 entity emerge out of bankruptcy. You don't have that here.

14 THE COURT: But liquidating 11s are allowed. I mean,  
15 Integrated Telecom tells us that.

16 MR. FREDERICK: That is true. But that is also why  
17 in this Court's decisions in BEPCO and SGL Carbon, it looked  
18 specifically at whether or not the entity claiming bankruptcy  
19 in order to use that process to evade certain litigation  
20 responsibilities had a parent and that the parent could either  
21 provide financing or bail it out of whatever financial  
22 difficulty it was in.

23 And so you have exactly that situation here where J&J  
24 was paying the talc liabilities and it paid the Ingham  
25 judgment. That's undisputed. So it was on J&J to pay that.

1 It chose to create an accounting fiction by shifting the  
2 liabilities on paper to JJCI. But Johnson and Johnson did it.  
3 Johnson and Johnson paid. And there's no reason, Judge Ambro,  
4 under your hypothesized situation one wouldn't look at the  
5 circumstances for that bankrupt entity to determine, yes, it's  
6 got a commitment for 5 billion, but is there some other  
7 mechanism by which it could get financing in order to pay other  
8 claimants?

9 Now, if I could go to some of --

10 THE COURT: The usual one would be, if in some way it  
11 had something going on, like the royalties coming and possibly  
12 DIP financing, I don't know. But I mean, if you are a  
13 claimant, it would seem that this bankruptcy is about as good  
14 as you can get absent getting punitives to have your claims  
15 determined, estimated, and paid.

16 MR. FREDERICK: Wrong. I'm sorry, Judge Ambro.

17 THE COURT: That's fine.

18 MR. FREDERICK: That is not correct. Sixty-eight  
19 hundred talc claimants have already settled. There has not  
20 been a single settlement since they filed for bankruptcy. What  
21 the bankruptcy does is it bleeds the oxygen out of the room for  
22 settlement by making every last claimant wait until there is  
23 not just a final plan confirmed but all appeals have been  
24 exhausted. So there might be a --

25 THE COURT: But that sounds like what you're -- the

1 problem there is, the stay that was given by the Court under  
2 362.

3 MR. FREDERICK: No. The problem is the funding  
4 agreement. The funding agreement by its plain terms --

5 THE COURT: And during the course of the appeal, you  
6 have a built-in stay without having asked for it.

7 MR. FREDERICK: That's exactly right. But the  
8 funding agreement also says no money flows until the last  
9 appeal has been exhausted. And so when you deal with any kind  
10 of complicated bankruptcy in which there might be multiple  
11 plans --

12 THE COURT: That the last appeal has been exhausted  
13 per that individual claim or per the case as a whole?

14 MR. FREDERICK: The case as a whole. No money flows.

15 And that's the problem that the funding agreement is  
16 not the be-all end-all to this for the claimants. And, Judge  
17 Fuentes, you asked exactly the right question which is, who's  
18 better off in such a system. And there's no reason to think  
19 that where J&J, which knew of talc liabilities for asbestos in  
20 1969 and was found to have engaged in reprehensible conduct,  
21 would not also be liable for judgments for these victims for  
22 the asbestos in a product that seemingly is innocent.

23 They've paid more than \$92 billion over the last six  
24 years to their shareholders in dividends and through stock  
25 buy-backs. So there's no question that outside the bankruptcy

1 system in which J&J is being benefitted as a non-debtor that  
2 they would be obligated to make payments for their own  
3 culpability for these people's problems.

4 THE COURT: Let's go back to Judge Ambro's  
5 hypothetical. So if you were on this panel, would you venture  
6 to write an opinion identifying the line? Or would you say, on  
7 these facts clearly not a legitimate or a good faith  
8 bankruptcy?

9 MR. FREDERICK: Judge Restrepo, I think fairly, I  
10 would urge the Court to say the precedents of your Court compel  
11 reversal and explain why. In doing so, some of those features  
12 of what constitutes a reasonable way to draw a line will  
13 emerge, but I don't think it's appropriate in a case  
14 essentially a first impression where you're looking at the  
15 Texas two step as the first appellate court to do that. You're  
16 looking at an entity that is not what Johns-Manville did and  
17 what was the precursor to 524(g). But it is a closed-end  
18 capped system in which Johnson and Johnson has an incentive to  
19 fix the value of the funding agreement by spinning off that  
20 agreement which is permitted under the funding agreement itself  
21 so you have an entity that is not like any other entity out  
22 there.

23 And so to say, preemptively, these would be the  
24 circumstances of which that would be permitted, respectfully,  
25 feels advisory to me. It doesn't feel necessary. And given

1 the creativity that led to the Texas two step phenomenon in  
2 which not a single one of these entities has ever emerged with  
3 a confirmed plan and in the meantime, we've had victims of all  
4 of these various torts go without a remedy, I don't think it  
5 would be correct or appropriate for the Court to create a  
6 roadmap for corporations to continue to do that. That should  
7 be subject to the warp and woof of litigation.

8 I would like to, though, address Judge Ambro a couple  
9 of your questions.

10 THE COURT: Sure.

11 MR. FREDERICK: You asked whether it was appropriate  
12 to look beyond LTL at JJCI. I think that the way that you  
13 appropriately do it under your cases is to look just at the  
14 debtor and you look at the debtor's financial distress at the  
15 time of filing. It is an eminent financial distress test for  
16 the debtor. And the reason why you do that is because the Code  
17 instructs that the debtor is going to be subject to the  
18 strictures of the Code and the opportunities that the Code  
19 presents. And so looking beyond that is not the way you start.

20 Now, your cases have also looked beyond the actual  
21 debtor to determine whether or not such things as financial  
22 distress is appropriate and so I can't say you shouldn't do  
23 that. I think it is appropriate in this case to look at what  
24 the assets are available by Johnson and Johnson to provide  
25 additional liquidity and additional remedies for the debtor.

1 But that's not typically where you start. The problem here,  
2 though, is that as Mr. Lamken pointed out, what LTL is seeking  
3 to do is to create a disfavored set of creditors. It is only  
4 the talc victims that are subject to this bankruptcy and the  
5 strictures created by the bankruptcy.

6 Now, Judge Ambro, you also ask which system is  
7 better. Now, leaving aside the academic discussions that I'm  
8 sure will ensue as soon as you have written --

9 THE COURT: We've seen them already.

10 MR. JANDA: -- this opinion, I would just say that --  
11 I would say a couple of things. For settlement and providing  
12 remedies to victims, the tort system is unquestionably better.  
13 Why? Because Johnson and Johnson has every incentive to engage  
14 in negotiations that are going to inure to its benefit, but  
15 will pay money. So the 6,800 talc victims that have already  
16 received a settlement from Johnson and Johnson was because  
17 Johnson and Johnson decided it was time to settle with them.

18 Now, it might have been that the law firm that was  
19 the firm superintending those particular claimants proposed a  
20 trial threat. That is a perfectly valid reason for J&J to  
21 decide we want to settle with that law firm and get them off  
22 the board.

23 THE COURT: And the tort system pays money also,  
24 doesn't it?

25 MR. FREDERICK: That's what I'm saying. That's what

1 I'm saying. You can't do what I just said in bankruptcy. You  
2 can do it in the tort system. And that has happened in the  
3 tort system. It's no secret that the way that the company  
4 would go about doing is from a top down. We are afraid of this  
5 law firm and we do not want to go against them in court. We're  
6 going to resolve those cases for that law firm, or we're not  
7 afraid of this law firm, but we think if we can set a low  
8 enough floor by settling out cheap, then that becomes the  
9 market price. And companies do that all the time. It is a  
10 perfectly rational way to go about resolving these.

11 That could happen in the mass tort MDL system. And  
12 it does not happen in bankruptcy because of the way the classes  
13 of the different creditors are set up and the voting rules that  
14 go along with relieving that system from the stricture of the  
15 bankruptcy rules.

16 Now --

17 THE COURT: Just a factual question. For some  
18 reason, I had assumed normally that punitives are not available  
19 in bankruptcy. But when I look at the briefs, there's not a  
20 strong statement that that's one way or the other. Are  
21 punitives available in a bankruptcy?

22 MR. FREDERICK: Well, we're now talking about  
23 negotiating. I think that the question of does a bankruptcy  
24 confirmed plan take into account punitive damages, I don't  
25 think the law is clear on that point. There is unsettled --

1 THE COURT: I agree.

2 MR. FREDERICK: And so the question then is, what can  
3 you negotiate and what is confirmable as a plan? Here, the  
4 anomaly is that Johnson and Johnson was hit with a higher level  
5 of punitive damages than Old JJCI. Why? Because it was the  
6 parent company that was misleading the scientists. It was the  
7 parent company that was dealing with the FDA and other foreign  
8 regulators with respect to asbestos.

9 And so the parent company was viewed by juries as  
10 more culpable for the reprehensible conduct than the consumer  
11 entity. And so when you look at the multiple upheld by the  
12 Missouri Court of Appeals in the Ingham case, that's why  
13 Johnson and Johnson was hit with higher punitives.

14 Now, how you would do the valuation of that in a  
15 confirmation of a plan, I hope that we never get to that  
16 because I would fervently urge you to rule that this was not a  
17 good faith bankruptcy. But I would suggest that that will be a  
18 much litigated question that will further delay the  
19 finalization of any bankruptcy plan.

20 You asked, Judge Ambro, about what if LTL had been  
21 created years earlier? I think part of the test of what you  
22 look at is whether it was still part of the parent company and  
23 that the parent company was continuing to finance. In which  
24 case, I don't think you would find financial distress. But  
25 again, the test would be under SGL Carbon and Integrated

1 Telecom, whether there was immediate or imminent financial  
2 distress at the particular time, years later, that it was  
3 seeking to declare bankruptcy.

4 But the second thing I'd like to say is that under  
5 that construct, one of the reasons why the Texas two step is so  
6 problematic in bankruptcy is that it does not provide for asset  
7 maximization for creditors. It is designed to starve off the  
8 claims of creditors who are claimants in the tort system.

9 And that purpose is a very important purpose of a  
10 Chapter 11 because the idea of allowing the reorganization is  
11 so that you can maximize the assets available to the creditors.  
12 But the Texas Divisional Merger Statute, as conceived and  
13 implemented in these various cases that are pending, doesn't do  
14 that at all. It tries to create a fixed cap. And, in fact,  
15 that was what the J&J treasurer said in July of, the year that,  
16 July of '21, that they were seeking to cap their talc  
17 liability. And so --

18 THE COURT: Yeah, but if they cap it at 61 billion  
19 and it turns out in a lot of the briefing that I've seen from  
20 your side that the actual amounts are going to be far less than  
21 that, does that make much difference?

22 MR. FREDERICK: We don't know and that's the problem,  
23 Judge Ambro. I can't give you a definitive answer to the  
24 question of what the value or what is going to be maximized or  
25 not. What I can tell you is that the incentives for J&J are to

1 drive the number as far down as they can and to wait out the  
2 talc claimants who are dying at some, you know, horrible rate  
3 every day while we're waiting for this. And that's where the  
4 incentives are being drawn in this case.

5           The problem that you also have with this is that  
6 you're targeting one particular class. So, Judge Ambro, if  
7 you're going to talk about any of the features that might go  
8 into what would be an acceptable plan for this, you have to  
9 take into account the fact that any kind of divisional merger  
10 that is seeking to skive off particular liabilities is going to  
11 treat all the creditors the same way so that if an entity like  
12 LTL goes into bankruptcy at some point in time, it has to meet  
13 the financial distress test. It has to meet the maximizing  
14 creditor value test. It has to have a valid purpose and not be  
15 for litigation. But it also can't target one class over  
16 another so that the current creditors of LTL, or J&J for that  
17 matter, get benefits that only the talc claimants uniquely  
18 suffer from.

19           So I think --

20           THE COURT: But in the course of a plan, I mean, you  
21 would have a classification under 1122 or whatever it is that  
22 specifically puts these people into their own class, would you  
23 not?

24           MR. FREDERICK: Well, if you did that, you are  
25 talking about an inordinately large class which creates its own

1 confirmation challenges and problems. And you're also dealing,  
2 respectfully, with people of different ages, different  
3 conditions, different states of ovarian cancer or situations  
4 with respect to mesothelioma. So you've got -- it's a much  
5 more complicated situation and that's why in the tort system,  
6 the way these are traditionally done, is that a group of cases  
7 will be settled and then a special master will be designated by  
8 the court to go through the circumstances of each individual  
9 claimant and determine based on that pop that has been achieved  
10 what each person is going to get. That is a much more  
11 challenging feature that would I think in the bankruptcy  
12 system.

13 THE COURT: All right. Thank you. Then we'll get  
14 you back on rebuttal.

15 We'll take a -- do you want a 10-minute break or a  
16 15-minute break, gentlemen?

17 UNIDENTIFIED SPEAKER: Whatever you like.

18 THE COURT: What do you guys want?

19 UNIDENTIFIED SPEAKER: Ten.

20 THE COURT: Ten-minute break. The boss spoke.

21 (Recess taken)

22 THE COURT: Mr. Katyal, whenever you're ready.

23 MR. KATYAL: Thank you, Judge Ambro. May it please  
24 the Court.

25 I very much appreciate the argument of my three

1 friends and I'd like to start by discussing three interlocking  
2 problems with what you just heard. Now, my friends said a lot  
3 and if it's okay with the Court, I'd like to take about four  
4 minutes, not two --

5 THE COURT: Fine.

6 MR. KATYAL: -- to try and describe these three  
7 points because they reinforce each other.

8 First is the narrow scope of your review. At this  
9 point, you're being asked to decide two questions. First, was  
10 the petition filed by LTL made in good faith, and second,  
11 should protected party litigation be stayed.

12 Now, my friends' arguments about harm to the  
13 claimants is premature. Those are plan confirmation questions,  
14 or at least ones for the 524(g) 75 percent vote. After all, as  
15 Judge Ambro reminded my friends, Congress handcrafted a  
16 specific solution to asbestos bankruptcy cases, which among  
17 other things requires a super majority to approve a plan. What  
18 my friends are doing is taking all of their complaints about  
19 the bankruptcy process and pushing that all into the good faith  
20 question. Those are questions for plan confirmation, not ones  
21 for today.

22 What is before you today is the bankruptcy court's  
23 conclusion that LTL acted in good faith. That court spent five  
24 trial days hearing from witnesses and crafted two detailed  
25 opinions, all of which rejects what you just heard. The

1 standard to overturn Judge Kaplan is daunting. As the Supreme  
2 Court in Lakeridge put it, "Factual findings are reviewable  
3 only for clear error with a serious thumb on the scale for the  
4 bankruptcy court."

5 Or as this Court just said in I-Fiber (phonetic), "In  
6 a complex case where the bankruptcy court does substantial work  
7 in seeking to understand the facts, great care must be  
8 exercised to defer to those findings." As for the other  
9 questions about protected parties and the stay, the bankruptcy  
10 court identified five separate bases for an injunction, and  
11 even the U.S. Trustee doesn't dispute them. That's the first  
12 point.

13 The second, the transfer of liability. Much of my  
14 friends' argument hinges on the notion that J&J, not LTL, last  
15 year evaded claims by restructuring. But the key fact is this,  
16 J&J didn't owe anything, didn't owe anything for these claims  
17 last year. J&J didn't owe anything the year before. J&J  
18 didn't owe anything for the preceding 43 years. That is  
19 because in 1979, J&J transferred its entire baby business and  
20 all of that liability to JJCI, a separate entity. And JJCI  
21 agreed to fully indemnify J&J for all claims.

22 So what actually happened last year? JJCI  
23 restructured and created two entities, New JJCI and LTL. Every  
24 dollar that the Old JJCI was liable for, every dollar of its  
25 own conduct and anything alleged by J&J, the New JJCI had

1 agreed to pay 100 percent. The restructuring and bankruptcy  
2 petition didn't debate anything. It was a full one-to-one  
3 placement. Indeed, it was even more than one-to-one for  
4 reasons our brief explains.

5 Now my friends say, well, they represent the victims  
6 and speak for them. That proves our point and proves  
7 Congress's point. They are all current claimants. Our  
8 argument is that each of their tort lawsuits has tunnel vision.  
9 It examines only their individual case and delays future ones.  
10 It's a home run or a strikeout and precious few get up to bat.  
11 The only way to get a system wide resolution that's  
12 comprehensive, that protects future claimants, is through  
13 bankruptcy.

14 Third, and finally, they ignore several key limiting  
15 principles of our argument, particularly Mr. Frederick, and  
16 four things make this case unique. First, a latency period of  
17 nearly 50 years with many, many future claimants who can't get  
18 any relief now and who risk not getting paid.

19 Second, wild lottery style judgments like Ingham,  
20 including some for billions, and a massive number of cases,  
21 40,000, with more filed every hour of every day of every year,  
22 creating a tsunami of litigation.

23 Third, Congress has expressed handcrafted rules for  
24 asbestos bankruptcy cases under 524(g), including a 75 percent  
25 super majority requirement and a rule that two courts, not one,

1 a bankruptcy court plus a federal district court, must approve  
2 the plan and scrutinize it for fairness and equity, and D,  
3 finally, all -- or fourth finally, all in the context of a 1979  
4 full transfer of liability from J&J to Old JJCI, as well as Old  
5 JJCI providing full indemnity back to J&J.

6           So this isn't a case of a parent dumping its  
7 liability the day before restructuring or anything like that.  
8 J&J has not been liable for decades. In short, nothing in the  
9 restructuring hurts the claimants. And even if you disagreed,  
10 the proper time to evaluate that is far down the road, and here  
11 you must just simply decide whether the petition is filed in  
12 good faith.

13           THE COURT: The blank response when you hear about  
14 the divisional merger statute and how it's used and people use  
15 the name pejoratively, Texas two step, is why didn't you just  
16 file Old Consumer? Life would be so much easier.

17           Now, you might still have a battle as to whether  
18 there was financial distress, but it would at least be arguably  
19 a cleaner battle.

20           MR. KATYAL: So, Your Honor, there's several  
21 responses, but the most important one is the one that the  
22 bankruptcy court gave after listen to the testimony. And you  
23 never really actually heard a response to it from my other  
24 side, which Judge Kaplan found is if you forced that entity,  
25 Old JJCI, to go bankrupt, it would have "a horrific impact"

1 because Old JJCI makes all sorts of -- JJCI makes all sorts of  
2 things like, you know, Band-aids, Tylenol, things like that.

3 THE COURT: It sounds to me like only that's an  
4 attempt to preserve goodwill, which of course has been earned  
5 over the years. But it sounds like the argument that's being  
6 made from your side is that it's a whole lot of inconvenience,  
7 a whole lot of inefficiency, a whole lot of harm to goodwill  
8 and why not allow this more creative way to separate out the  
9 bad from the good.

10 MR. KATYAL: Your Honor, that is part of the  
11 argument. It is not by any stretch the whole argument.

12 So just to take a step back, I think what the  
13 Bankruptcy Code would ask is the relevant question is, is the  
14 bankruptcy petition maximizing the value of the debtor's  
15 estate. That's the goal, the purpose that we are isolating  
16 from Page 120 of Integrated Telecom.

17 So I don't think the Bankruptcy Code says you're to  
18 burden debtors for the own sake. You're supposed to do it  
19 because in some sense, it's going to maximize the value. And  
20 so one thing, and this is my first answer to you, what Judge  
21 Kaplan found is that you are maximizing the value by going  
22 through the divisional merger statute, because otherwise there  
23 will be actually less money available including to claimants  
24 because of the loss of goodwill, the loss of all that, you  
25 know, forcing the entire company into bankruptcy, all the

1 different findings he found.

2 Now another key part of this is there's two possible  
3 reasons I think my friends isolate for why you'd want this  
4 larger entity, to force this larger entity to go bankrupt. One  
5 is because you want to guarantee the amount of money that this  
6 larger entity, JJCI, has for claimants. And that's exactly  
7 what the funding agreement does.

8 THE COURT: So does Old JJCI qualify for financial  
9 distress?

10 MR. KATYAL: We believe it does, as does LTL --

11 THE COURT: So if it --

12 MR. KATYAL: -- as (indiscernible) U.S. Trustee.

13 THE COURT: If it does, then isn't it the real party  
14 in interest?

15 MR. KATYAL: Well, I don't know if it's a real party  
16 at this point because LTL is the one that filed the petition.  
17 We agree with Judge Kaplan. Either way you slice it, whether  
18 it's LTL or JJCI, there's massive financial distress. And I  
19 can go through that evidence.

20 But I do want to first really deal with your first  
21 question because I think it's the heart of what --

22 THE COURT: Excellent. They're dovetailing together.

23 MR. KATYAL: Yeah, they dovetail. But Mr. Lamken  
24 really spent a lot of time on this idea that Old JJCI was the  
25 entity that had to go bankrupt.

1 And our first point to you is the one main reason why  
2 he's isolating is because you want claimants to get paid. But  
3 this funding agreement gives the entire value of JJCI, the  
4 entire value, \$61 billion free and clear to the potential  
5 claimants so that entire pot of money is available.

6 Now my friend says maybe JJCI will squander the  
7 assets and that's why you need bankruptcy court jurisdiction,  
8 maybe they'll transfer it to equity.

9 The funding agreement, this is quite important to our  
10 argument, the funding agreement itself bars that or if it  
11 occurred if there were any payment to J&J or to shareholders or  
12 anything like that, distributions, all of that increases the  
13 \$61-billion pot; \$61 billion is only a floor, not a ceiling.

14 I'd like to walk you through the language of the  
15 funding agreement so that you -- so that it's clear why my  
16 friend's argument is wrong.

17 So the funding agreement says that you would take the  
18 greater of either, one, the fair market value of Old JJCI  
19 immediately prior to the divisional merger. That amount is  
20 \$61.56 billion, that's Appendix Page 7422. Or it says it's the  
21 fair market value on the date that LTL and the new JJCI refused  
22 to pay under the funding agreement. That's at Appendix Page  
23 4316 and 4619.

24 Here's the most important point about 4619. If a  
25 hypothetical that my friend says happens and it materializes

1 that JJCI does something to try and give J&J money to -- you  
2 know, in the form of distributions or something like that, that  
3 just bumps up the amount of the funding guarantee under the  
4 agreement. That is Page 4319.

5           So the funding agreement solves for exactly the  
6 problem. We don't think there's anything in the Code that  
7 requires, of course, you know, the larger entity to declare  
8 bankruptcy. But to the extent you're worried about it, to the  
9 extent you're worried, oh, you know, maybe this is going to  
10 create some bad incentive, the funding agreement does that.  
11 And here's the second most important point. J&J guarantees  
12 that funding agreement, not just JJCI.

13           In the current world, in the pre-restructuring, pre-  
14 bankruptcy baseline world, they could maybe try and sue JJCI.  
15 We know those lawsuits take time and so on. We could talk  
16 about that in a moment. But the most important point is  
17 whatever their lawsuits would get, it would only get up to \$61  
18 billion and not even that because that money is not free and  
19 clear. It would be subject to all of the other creditors that  
20 JJCI have and stuff like that.

21           And, of course, there's no J&J guarantee under the  
22 pre-restructuring world.

23           THE COURT: Let me work backwards. When do funds  
24 come out of the funding agreement to pay claimants in a  
25 bankruptcy?

1 MR. KATYAL: So under the terms of the agreement,  
2 first, LTL has to pay and whatever they have. And then New  
3 JJCI is to pay whatever they have. And then afterwards,  
4 anything else if there's any excess, it goes to --

5 THE COURT: What about the points Mr. Frederick makes  
6 that no monies come out until all the appeals are resolved?

7 MR. KATYAL: Well, I think that's true of course in  
8 the regular tort system in the bonds under Rule 62 of Federal  
9 Rules of Civil Procedures. I don't think that's any different  
10 from the standard system.

11 And, of course, here I think you've got to grapple  
12 with Judge Kaplan's finding that there are -- you know, 49  
13 trials have happened, Your Honor, to date in all of these  
14 cases.

15 THE COURT: Thirty-five have gone to verdict, right?

16 MR. KATYAL: Yeah, very very few out of --

17 THE COURT: So 18 you won, 17 you lost?

18 MR. KATYAL: Yeah. And then some of those were  
19 reversed on appeal. And as Judge Kaplan said, you know, we  
20 have a very good batting rate for all of the reasons that our  
21 briefs explain. But, nonetheless, at the end of the day,  
22 there's going to be financial distress because of the massive  
23 number; 40,000 lawsuits and more being filed every day.

24 THE COURT: Well, let's go back to you said the full  
25 amount of all assets of Old JJCI are available to pay

1 claimants. So, once again, you come back to my question. Why  
2 not file Old JJCI in the first place?

3 MR. KATYAL: Yeah, for two reasons. One is it would  
4 reduce the number of the dollars actually available to  
5 claimants because, forcing as Judge Kaplan found, Old JJCI into  
6 bankruptcy reduces the value of JJCI.

7 THE COURT: Except you've got a company that has --  
8 is ongoing with very very profitable products that have been  
9 well earned over decades.

10 MR. KATYAL: And that's exactly Judge Kaplan's point,  
11 which is you don't have to -- because of the funding agreement  
12 because you get all of the good without the bad, you get the  
13 full value of the company not subject to any creditors or  
14 anything like that. It's free and clear up to \$61 billion, and  
15 then you get a backstop from J&J.

16 And remember my friends, their brief says J&J has  
17 better credit than the United States government. So in terms  
18 of which deal is better for the claimants, for all the  
19 claimants, not just my friends sitting at the table but  
20 including future claimants, which is a huge chunk as Congress  
21 noted in 524(g) because of the latency period for asbestos.

22 THE COURT: If I understand you correctly, if I'm  
23 hearing you correctly, it almost sounds like J&J did this to  
24 benefit the claimants. They had the claimants' best interest  
25 at heart and then they do this Texas Two Step.

1 But the timing doesn't suggest that. The timing  
2 suggests that this was really done for a litigation advantage.  
3 As I understand it, LTL is created four months after the  
4 Supreme Court denies cert in the Missouri litigation, and the  
5 next day they declare bankruptcy.

6 So how do you reconcile that for me because I'm a  
7 little troubled.

8 MR. KATYAL: Absolutely, Your Honor.

9 And this is exactly what my friends said to Judge  
10 Kaplan, and he rejected it on the facts, not litigation  
11 advantage but four separate purposes.

12 The first purpose --

13 THE COURT: But you concede that there is a  
14 litigation advantage by doing this?

15 MR. KATYAL: Well, I think it's a byproduct of this.  
16 Absolutely.

17 THE COURT: So there is a litigation advantage?

18 MR. KATYAL: Well, I think it's a byproduct but, as  
19 Judge Kaplan found, that wasn't the reason.

20 LTL has been transparent. there's been lots of  
21 discovery on this that Judge Kaplan referred to and said, no,  
22 the reason for this is four-fold: First, that there's huge  
23 defense costs to the tune of two- to five-million dollars per  
24 case multiplied by as many as 40,000 cases. You didn't hear a  
25 word from my friends, they had a lot of time up here, they

1 didn't have an answer to what Judge Kaplan found. That's a  
2 huge deadweight loss.

3 Every one of these cases costs us millions to fight,  
4 and even if the claims are meritless. So that's all money that  
5 could be going to the claimants but now is not going to the  
6 claimants. Instead, it's going to pay attorneys.

7 The second is, as I was saying to Judge Ambro, the  
8 horrific impact is what Judge Kaplan called the massive  
9 disruptions that would endure if Old JJCI was forced into  
10 bankruptcy. That's at Page A-47.

11 Third, the equity concerns for future claimants,  
12 which is of particular concern here given Congress' hand-  
13 crafted statute in 524(g) and this very long latency period.  
14 We understand my friends have to zealously represent their  
15 client before this Court. They represent current clients.

16 What Congress is telling you is there's a worry about  
17 latency and about future claimants, and this is a solution  
18 that's comprehensive for everyone.

19 And, lastly, Your Honor, it's because Judge Kaplan  
20 found that bankruptcy process is a lot faster than the tort  
21 process. My friend talked about 6,800 settlements but doesn't  
22 mention what Judge Kaplan said about that, which is he said two  
23 things: One, that will be dwarfed by the 40,000 cases that have  
24 already been filed and the many more that will come and, also,  
25 he said that the past number of settlements won't occur in the

1 future -- and this returns to your question, Your Honor --  
2 because of Ingham.

3 What Ingham did was basically create a shiny object  
4 for folks to try and keep their cases in the tort system with  
5 the hope of a lottery-style big pay day. Some people will get  
6 home runs. Most people, Judge Kaplan found, don't get a turn  
7 at the bat.

8 That's what J&J -- excuse me, that's what LTL was  
9 dealing with in this restructuring and that's why the funding  
10 agreement is written the way it does. It provides my friends  
11 as well as future claimants a guarantee of at least \$61  
12 billion.

13 Now, Judge Ambro, I think you pointed out, well,  
14 there's some kind of contradictions here, how much are the  
15 claims really worth. You know, and Judge Kaplan, of course,  
16 talked about that in his opinion. He said --

17 THE COURT: Yeah. I didn't see any strong defense of  
18 his 190 billion.

19 MR. KATYAL: Well, it's up to 190 billion. And it  
20 was just the defense costs. And he got it by simply saying two  
21 to five million dollars per case multiplied by 40,000 cases.

22 THE COURT: But it was the high end of every --

23 MR. KATYAL: Correct. And we're not defending  
24 necessarily --

25 THE COURT: -- every case.

1 MR. KATYAL: -- the high end, of course.

2 But we do -- we are defending vehemently Judge  
3 Kaplan's conclusion after hearing from expert after expert  
4 including Dr. Bell about the level of financial distress that  
5 the company faced. And my friends are asking you to re-weight  
6 the evidence and say, oh, well, these lawsuits actually don't  
7 impose as much of a present liability or this or that.

8 Judge Kaplan evaluated all of that and found  
9 financial distress, including most significantly in 2019 the  
10 Consumer Division had a \$2.1 billion profit. And just the very  
11 next year because, Your Honor, because of Ingham along with  
12 other talc litigation, they had a \$1.1 billion loss in one  
13 year. And talc liability, Judge Kaplan found, was responsible  
14 for that.

15 If you look at the years 2018 to 2020 --

16 THE COURT: Talc liability was responsible for a  
17 significant portion of that, wasn't that correct?

18 MR. KATYAL: Correct. Yes, a significant portion of  
19 that.

20 And the talc litigation, for example, Judge Kaplan  
21 found from the years 2018 to 2020 costs 32 -- 27 percent of all  
22 costs of Old JJCI and 32 percent in the year 2021.

23 THE COURT: But coming back to the -- at the outset,  
24 if you have a parent company and it has a subsidiary that's  
25 changed its name but the subsidiary's been there for 43 years.

1 And the subsidiary has a major problem with one of its products  
2 that's caused mass tort litigation and some fear of what could  
3 happen in the future.

4 Usually what happens over all these decades is you  
5 file the subsidiary and you go from there. The concern -- and  
6 you said that all of the assets of Old JJCI will be put into  
7 play for funding the claimants' claims that are valid. And you  
8 look at the next case, I think as Mr. Frederick said, and  
9 you're worried about, okay, you don't have a Johnson & Johnson  
10 consumer, you have Acme, you know, Acme, Inc.

11 I don't mean the grocery chain, by the way. I  
12 apologize to them. I'm thinking of the old Warner Brothers  
13 cartoons.

14 But that they don't have 61 billion. They are there  
15 with maybe four or five billion at tops. They're going to run  
16 out of things, and they're saying we're going to do this  
17 divisional merger and go from there. And you can see that the  
18 slippery slope comes into play and people are saying let's stop  
19 this before it really gets out of hand.

20 MR. KATYAL: Right. Totally.

21 THE COURT: That's the concern.

22 MR. KATYAL: We are very sympathetic to exactly that  
23 argument, Your Honor. So refer to three points. One is you're  
24 exactly right that the ordinary course is a subsidiary would  
25 declare bankruptcy. That's your own opinion joined by Judge

1 Fuentes in In re Owens Corning back in 2005. That's exactly  
2 what happened. That's what this Court approved.

3 Second, we're not here defending something in the  
4 absence of a funding agreement. If there is no funding  
5 agreement, that valid bankruptcy purposes that Judge Kaplan  
6 isolated those four look very different. They look like  
7 litigation advantages.

8 But here, if you were to ask what is the litigation  
9 advantage that is served that could somehow dwarf Judge  
10 Kaplan's four different findings of valid purpose, it would be  
11 -- you're hard pressed to do so because this deal gives -- this  
12 restructuring and this petition gives actually more to the  
13 claimants, now all the claimants including future claimants.

14 And that's what Congress is telling you've got to do.

15 THE COURT: This funding agreement has a bifurcation.  
16 It will fund in bankruptcy and out of bankruptcy. Isn't that  
17 correct?

18 MR. KATYAL: I believe it only funds in bankruptcy.  
19 I mean --

20 THE COURT: So what's it do outside of bankruptcy?

21 MR. KATYAL: I don't think it has any life outside of  
22 the bankruptcy.

23 So, you know, basically it's a --

24 THE COURT: So in Ingham when Johnson & Johnson  
25 stepped up and paid, it did it for what reason? Because of a

1 judgment was against it?

2 MR. KATYAL: So, actually, it's just flatly wrong,  
3 Your Honor. Ingham was paid not by Johnson & Johnson.

4 THE COURT: Okay.

5 MR. KATYAL: It was paid by JJCI. I don't know where  
6 my friend is getting that from. And, you know, indeed, I can  
7 point you to different parts of the record which directly  
8 contradict what he's saying.

9 THE COURT: Of the 17 verdicts or of the portion of  
10 the 17 verdicts not overturned on appeal, how many of those  
11 verdicts also were against J&J?

12 MR. KATYAL: I think some may have been against J&J  
13 for derivative liability or something like that. But all of  
14 them were paid for by JJCI or now LTL. Every one. Every  
15 dollar.

16 And so, you know, the 1979 agreement actually is  
17 written to say it's a full transfer of liability to JJCI but it  
18 also says full indemnification for J&J and everything has to be  
19 paid for by JJCI or now LTL. So any suit against J&J at any  
20 point is always going to be paid by now LTL. That's the logic  
21 behind Judge Kaplan's finding on question two about whether the  
22 stay should be extended to protected parties.

23 THE COURT: One of the questions I asked the other  
24 side, more than one counsel, is when you look at this picture,  
25 are you taking into account just LTL or LTL and Old JJCI, and

1 their answer uniformly was LTL.

2 It sounds like from what you're saying that part of  
3 the equation here is taking into account Old JJCI.

4 MR. KATYAL: Well, we think actually -- we agree with  
5 the U.S. Trustee that the relevant question is actually is  
6 whether LTL as the petitioner is basing financial distress, but  
7 we can understand why Judge Kaplan also made findings on Old  
8 JJCI which --

9 THE COURT: Yeah, because he specifically -- he  
10 meshed them together.

11 MR. KATYAL: Yes. He found either way that there was  
12 going to be financial distress. And so we agree with -- you  
13 know, we agree with the way Judge Kaplan approached it. So  
14 either way, whether you look at LTL and the litigations they  
15 faced or you looked at Old JJCI and the litigations they face,  
16 either way it's going to meet this Court's test for financial  
17 distress.

18 What Mr. Frederick said is take a look at the three  
19 cases that this Court has decided, BEPCO, SGL Carbon, and  
20 Integrated Telecom. We very much want you to look at those  
21 cases because all three I think are miles away from this case.  
22 In BEPCO, there were six litigations in total, six. In SGL  
23 Carbon, six complaints in the United States, one in Canada.  
24 Integrated Telecom, a whopping one securities case at issue  
25 there.

1 And most importantly, each of those cases --

2 THE COURT: But in -- let's just take for example SGL  
3 Carbon, it looked like what was being done was ultimately to  
4 file for bankruptcy and in the end when you have a dissolution,  
5 it will be under state law that will return equity back to the  
6 equityholders which one would under the absolute priority rule  
7 in bankruptcy not see happening.

8 MR. KATYAL: So I think -- you know, I think SGL  
9 Carbon really goes on the notion of few litigations and this is  
10 done for litigation advantage. That's Page 124 and 125 of that  
11 decision.

12 Of course, here to the extent you're worried, Your  
13 Honor, about what my friends said about somehow money being  
14 paid to equity and a violation of the absolute priority rule,  
15 as I was saying, the funding agreement captures that because  
16 every dollar that goes to J&J from JJCI in the form of a  
17 distribution at Page 4319 of the record makes very clear this  
18 funding agreement says that just bumps up the value of new  
19 JJCI, the amount available to the claimants.

20 THE COURT: How would you propose in the example I  
21 noted that you'd have a much less funded entity in bankruptcy  
22 and a much less funded backstop, how would you propose that bad  
23 consequences be blunted?

24 MR. KATYAL: Through the Court's review process. So  
25 -- and even before the review process, of course, was the

1 524(g) solution because 75 percent of the claimants would have  
2 to approve it and, Your Honor, as you said to my friend on the  
3 other side, you always have the possibility of filing an  
4 adversary action for fraudulent conveyance.

5 And, indeed, they tried some of that language in the  
6 bankruptcy court. They tried to suggest this was a fraudulent  
7 conveyance. But at this Court as this case comes to the Court,  
8 they dropped all of that out because I think it doesn't cut the  
9 mustard. Here this funding agreement is --

10 THE COURT: The only answer I got was it's premature  
11 to do so now. Let's figure out whether the filing was in good  
12 faith and then they'll cross that bridge when they come to it.  
13 I mean that's the answer that I got.

14 MR. KATYAL: Yeah. And I just don't think that  
15 ultimately answers the question.

16 And I just want to return for a moment to those three  
17 cases that my friend was referring to because pointedly they  
18 distinguish between those six or seven litigations and the many  
19 thousands, I think 16,000 that were at issue in Johns-Manville.  
20 And they said that is the kind of -- certainly the kind of  
21 flood of litigation that would create financial distress.

22 And here Judge Kaplan looked at the existing 40,000  
23 litigations and said that is certainly enough for financial  
24 distress given the numbers, the testimony from Dr. Bell that I  
25 referred to earlier, and the like.

1 THE COURT: Is LTL fully capable of satisfying the  
2 talc claims?

3 MR. KATYAL: By itself without a resort to the  
4 funding agreement, we think the answer to that is no. But with  
5 the funding agreement, absolutely.

6 Our position, and Judge Kaplan found this too, is  
7 that we believe that \$61 billion, which is of course only a  
8 floor, it could go up, is enough to pay a hundred percent of  
9 all valid claims. And when I say valid claims, it excludes two  
10 things. It excludes the deadweight losses of billions and  
11 billions of dollars paid to lawyers for defending against this.

12 So the bankruptcy system avoids that, as Judge Kaplan  
13 explained. And second, this gets to a question that, Your  
14 Honor, you asked Mr. Frederick, it excludes lottery-style  
15 punitive damages. You're absolutely right, we spent a long  
16 time looking trying to understand does the bankruptcy system  
17 bar punitive damages. I think the answer to that is, no, it  
18 doesn't bar them. And we certainly think that -- but we think  
19 that it would even it out to the extent there were any  
20 available.

21 The way that I think the process would unfold, Judge  
22 Ambro, is there's been an estimation expert appointed by the  
23 name of Ken Feinberg, you know, obviously an expert in this  
24 field. He is going to look at the amount of liability and he  
25 could, I suppose and probable we'll get briefing on, should

1 punitive damages be part of that estimation process.

2 THE COURT: Does J&J have any direct liability in  
3 this case? And given the 50-year latency period of these talc  
4 claims, right, does J&J have any direct liability or direct  
5 exposure?

6 MR. KATYAL: We don't think they have -- we certainly  
7 think they have any exposure. I'll walk you through the  
8 language of the 1979 transfer.

9 So it first transfers, quote, all of the business of  
10 the Baby Division to this subsidiary, JJCI, and all assets and  
11 liabilities. Judge Kaplan excerpted it at A-163 and A-164.  
12 And then it says JJCI, quote, agrees to assume all the  
13 indebtedness, liabilities, and obligations of every kind and  
14 the subsidiary will forever indemnify and save harmless J&J  
15 against all the indebtedness, liabilities, and obligations.  
16 That is a very very strong indemnification.

17 So J&J -- and that's why since this has been written  
18 in 1979, J&J hasn't paid a dime. It has always been Old JJCI.  
19 Now it's true there was a centralized account which is used in  
20 lots of parents and subsidiaries in which J&J initially may  
21 have sometimes paid that cash out. But as the record shows, it  
22 was always booked back to Old JJCI. That's Appendix Pages 4107  
23 and Appendix 8103.

24 And, you know, as I say, if you look at who paid  
25 Ingham, it was not J&J. It was JJCI.

1 THE COURT: Why would punitive damages be a factor to  
2 consider?

3 MR. KATYAL: Because I think -- and Congress was  
4 worried about this in 524(g). Because you have the massive  
5 number of future claimants with this long 50-year latency  
6 period, you have to worry that a \$2-billion verdict in Ingham  
7 added to other punitive damage verdicts will take away from the  
8 ability of future claimants to recover.

9 That's why we're here, Your Honor. That's the  
10 purpose. You know, that's what Judge Kaplan found was the  
11 purpose based on looking at this evidence. I know it makes for  
12 a good story to say, you know, this big company that has all  
13 these profits is somehow trying to evade responsibility or  
14 something like that. And as I said, the agreements from 1979  
15 on has always transferred all of that liability.

16 Now, Judge Ambro, you asked my friend on the other  
17 side, well, what if this were done in 2014 or what if the  
18 restructuring as opposed to now is the use of this Texas  
19 divisional merger statute, what is the problem there.

20 And I think the Bankruptcy Code takes the debtor's  
21 corporate structure as a given as it comes under state law.  
22 And we followed here Texas law meticulously. And I think it  
23 would be a very dangerous rule for this Court if you were to  
24 start line-drawing. And I couldn't hear my friend's answer to  
25 the questions about line-drawing, is 2014 okay, is last year

1 okay, is two days different or something like that.

2 And so I think that's one important point. The other  
3 is actually that 524(g) itself contemplates pre-petition  
4 restructuring, and I would point you to 524(g) (4) (A) (ii) (V).  
5 Sorry about the --

6 THE COURT: The long statute.

7 MR. KATYAL: Exactly. It is a long statute.

8 But it provides that a channeling injunction can bar  
9 actions, quote, directed against a third party and arriving  
10 because of its involvement in a transaction changing the  
11 corporate structure of the debtor or a related party.

12 And so if Congress thought that a full company is the  
13 thing that must declare bankruptcy, I don't think it would have  
14 included this provision in it. Rather, I think Congress  
15 anticipated basically that there would be pre-petition  
16 restructuring.

17 I think it's notable that my friends for all their  
18 saying they say we're inconsistent with the Bankruptcy Code,  
19 what provision are we inconsistent with? What provision are we  
20 violating? There's some meta principle I guess that they're  
21 isolating, but they can't point to any particular provision.

22 THE COURT: They're pointing out the gateway  
23 provision that you have to file a bankruptcy in good faith.  
24 And they're claiming that this was not done. So that's what  
25 we're talking about. That's the primary issue today.

1 MR. KATYAL: And if that's what they're isolating, we  
2 think Judge Kaplan found four different reasons why that -- why  
3 the valid purpose of bankruptcy has been served.

4 THE COURT: One just fact question, in terms of the  
5 proposal made here to deal with the liabilities of LTL and the  
6 funding, were those types of proposals, any variation of that  
7 made in connection with the MDL litigation?

8 MR. KATYAL: I don't believe the funding agreement  
9 had anything to do with the MDL litigation. Rather, as the  
10 Court found in --

11 THE COURT: Yeah, I'm just saying the concept.

12 MR. KATYAL: Yeah, I don't know about the concept. I  
13 mean I think the only thing I'm aware of is the Court's finding  
14 in A-13 (phonetic) relying on their own expert that this was a  
15 single integrated transaction and so -- with the restructuring  
16 and funding agreement.

17 Now you had asked before, Your Honor, I just have to  
18 slightly correct something. I understand that the funding  
19 agreement does have provisions for funding outside of  
20 bankruptcy.

21 THE COURT: Yeah, that's what I thought.

22 MR. KATYAL: Yes. So I apologize for that. But our  
23 --

24 THE COURT: What are the opt-outs that are being  
25 considered?

1 MR. KATYAL: So the 524(g) process has --

2 THE COURT: People who can say I don't want to be  
3 part of the bankruptcy, I'm going to opt out and go forward  
4 with respect to my litigation.

5 MR. KATYAL: Yeah. So, I mean, I think Congress put  
6 that into the statute itself saying there has to be a 75  
7 percent requirement for the plan and then, of course, there's  
8 two-court review. So there's a lot that has to happen.

9 And I think th most important point about that is --

10 THE COURT: You contemplate that this plan even  
11 though it's not yet in place will allow for any type of opt-  
12 out?

13 MR. KATYAL: I don't know that we have gotten that  
14 far. I think that's a pre -- to use a word from earlier, I  
15 think that's a premature question. But I would say that, you  
16 know, 75 percent threshold is of course very daunting. We are  
17 highly incentivized to put a good plan together because  
18 otherwise we get returned to the mass tort system with all of  
19 the uncertainty and all of the problems attendant to it.

20 And Judge Kaplan -- you know, my friend Mr. Frederick  
21 said he wants you to write a decision really about these facts.  
22 We absolutely agree. Judge Kaplan has said time and again his  
23 goal is to move this thing incredibly expeditiously. My  
24 friends on the other side said they thought this process could  
25 be done as early as the first quarter of next year.

1 And Judge Kaplan has rejected time and again any  
2 attempt to delay the bankruptcy process which looks very  
3 different, of course, than what's going on in the tort system  
4 as Your Honor was asking my friends on the other side. Massive  
5 delay, only a few trials to verdict. And, you know, as Judge  
6 Kaplan found, future trials are going to be even more delayed  
7 and very few settlements because of the Ingham verdict and  
8 other things.

9 And so you are asked to compare two different worlds.  
10 One is the baseline of the pre-restructuring, pre-bankruptcy  
11 world in which Johnson & Johnson owes nothing, in which some  
12 people slowly get paid but that's subject of course to any  
13 other claims against Old JJCI, any recovery. There are huge  
14 defense costs, and future claimants risk not getting paid with  
15 all the latency.

16 And under the restructuring and the funding  
17 agreement, instead, you have a very different world, one with a  
18 \$61-billion plus floor. That money is guaranteed free and  
19 clear. You have a faster process so current claimants get paid  
20 and future claimants have a voice at the table. They have a  
21 representative because that is under 524(g). And, of course,  
22 the claimants, including everyone sitting at that table, will  
23 -- we have to persuade three-quarters of them that this is a  
24 fair and equitable solution and then we have to persuade two  
25 different courts about that, the bankruptcy court and the

1 district court after that.

2 And we will have, you know, Ken Feinberg's estimation  
3 as part of that to start to break what otherwise has been an  
4 intractability between the parties.

5 THE COURT: Is LTL going to continue as a going  
6 concern afterwards or is this just a liquidating trust, in  
7 effect?

8 MR. KATYAL: Well, we suspect that, you know, LTL  
9 does have, for example a royalty business that will continue.

10 THE COURT: How much does that bring in a year?

11 MR. KATYAL: It brings in about \$50 million, the  
12 record shows, a year and is worth about \$350 million. So by  
13 itself, Your Honor, to answer one of your earlier questions,  
14 that isn't enough to -- that money isn't enough to avoid  
15 financial distress.

16 And so if LTL doesn't restructure and doesn't have  
17 the funding agreement available to it, then obviously, it's  
18 going to be under water and have all the problems Judge Kaplan  
19 referred to.

20 THE COURT: What do you make of the stay? Your  
21 friends, as you keep referring to them, are adamant that the  
22 Court would exceeds its jurisdiction with respect to the stay,  
23 issue number two.

24 MR. KATYAL: Yeah. We think that Judge Kaplan, as I  
25 say, he identified five reasons why there is and crucial to all

1 five, and they're all independent of one another, they have to  
2 run the table. But I think once central idea he had is that  
3 this involves the same basic claims during the same time  
4 period.

5 And what he did is a limited stay against certain  
6 parties, and it's a surgical one. In order for a stay to  
7 occur, two things have to happen. One is --

8 THE COURT: Surgical with 670 parties?

9 MR. KATYAL: Yes.

10 THE COURT: Non-debtors.

11 MR. KATYAL: Yeah. Well, but again, Your Honor,  
12 we're talking about a massive amount of litigation. 670  
13 versus, as I say, 40,000 claims that are currently in  
14 existence. I'll read to you the terms of this --

15 THE COURT: How many insurers are we talking about of  
16 that 670? Is the whole shooting match 670?

17 MR. KATYAL: I think it is; the whole shooting match  
18 is 670. The insurers, the list is at Pages A-249 and 250. I  
19 don't think it's very many. It's like AIG, Prudential, and the  
20 like. Let me read to you the terms --

21 THE COURT: How many retailers?

22 MR. KATYAL: The retailers are -- that's a three-page  
23 list at A-245 to '48. There are a number of them. It  
24 includes, you know, CVS and things like that. And here's what  
25 it includes, and then let me tell you what it doesn't include.

1 THE COURT: Okay.

2 MR. KATYAL: It includes two things: one, claims --  
3 or two things must have to happen. The claim must first arise  
4 from the manufacture or sale of talc-containing products by Old  
5 JJCI or J&J and, second, that were asserted against or could  
6 have been asserted against Old JJCI. That's Joint Appendix  
7 Page 195.

8 And so it's not, for example, a stay on unrelated  
9 things like mesh litigation against J&J or anything like that.  
10 And it's done, and this is crucial, it's done for a simple  
11 reason, because if you can start suing, Judge Ambro, the  
12 retailers like CVS or the insurers, that reduces the overall  
13 pot of money that is available to the claimants, both present  
14 and future. And particularly in a world in which Congress has  
15 said a 75 percent super majority threshold that we have to  
16 convince --

17 THE COURT: CVS has its own insurance, right?

18 MR. KATYAL: CVS may have some of its own insurance,  
19 but certainly, you know, I think that there will be  
20 indemnification obligations that Judge Kaplan found were  
21 automatic at Page A-181. And so -- and I don't think automatic  
22 is even the test, but even to the extent you thought it was,  
23 there were automatic indemnity obligations.

24 And so I think what Judge -- what the logic behind  
25 this stay is is that otherwise that limited amount of money

1 will be going to these other things and, therefore, reduce our  
2 ability to actually persuade 75 percent of them to confirm a  
3 plan which is of course what Congress is asking for here.

4 Congress looked at the problems with the mass tort  
5 system, the problems with the MDL, which by the way here  
6 include no state claims, include no meso claims. It wouldn't  
7 include Ingham, for example. So -- and Congress decided that  
8 MDLs wasn't the way to deal with this specific problem.

9 And so return to an earlier question you had, Your  
10 Honor, about the precedent that's set, those four limiting  
11 principles that I said at the outset we think are crucial here.  
12 We're not saying that you can do this in other areas where you  
13 don't have a latency problem. But here you do. You have a  
14 huge number of future claimant, and Congress has isolated  
15 specifically that out.

16 THE COURT: But can be taken into account were one to  
17 get a settlement in an MDL.

18 MR. KATYAL: I'm sorry. Could you --

19 THE COURT: That could be taken into account were one  
20 to get a global settlement in an MDL --

21 MR. KATYAL: But an MDL will never give you the stay  
22 that --

23 THE COURT: -- litigation.

24 MR. KATYAL: An MDL will never give you the stay on  
25 litigation hat is necessary to craft a kind of comprehensive

1 plan. All an MDL does is coordinate pretrial proceedings. And  
2 --

3 THE COURT: But they often do result in settlements.

4 MR. KATYAL: They may result in settlements, but in  
5 order to, Your Honor, I think to go that way, you're going to  
6 have to jump over Judge Kaplan's findings about settlements in  
7 which he found that because of Ingham and because of a variety  
8 of other things, the past settlement rate is no guarantee and,  
9 indeed, is not going to happen in the future, that fewer  
10 parties are willing to settlement because of Ingham and because  
11 of other things like the FDA test and things he isolated at  
12 Joint Appendix Page A-41.

13 THE COURT: If settlement is a viable option in the  
14 context of a bankruptcy via a plan, of course, why would it not  
15 also be a viable option in an MDL?

16 MR. KATYAL: Because you don't have -- for one thing  
17 you don't have future claimants at the table. So Congress has  
18 specifically put in 524 --

19 THE COURT: But a settlement could have provisions  
20 for future claimants. Could it not?

21 MR. KATYAL: It could, but they don't have any voice  
22 in the process. And so the incentive is -- as, you know,  
23 again, and I don't fault my friends, but their job is to  
24 zealously advocate for current claimants, their clients. There  
25 is no -- that's why I think Congress wrote the statute in 524

1 that it did.

2 And, you know, could you imagine some hypothetical  
3 world in which the MDLs do actually do all this? I suppose you  
4 could. It's just there's literally no evidence that that's  
5 ever happened in the amicae [sic] briefs that are before you  
6 including I would suggest The National Association of  
7 Manufacturers brief at Pages 15 to 16 really goes into detail  
8 about the inability of MDLs to actually provide any relief or  
9 any settlements, actually, that generate payments to the  
10 claimants.

11 And so, again, to return Your Honor to the question  
12 you asked my friend on the other side, which is what's the more  
13 efficient solution, what's the way. We've gone through this  
14 process for year after year, and it's not working. Congress  
15 has given you a different approach, a different way to go in  
16 524(g). And what we've done is, through the use of this  
17 funding agreement, provide a backstop that's much better than  
18 they could get under the mass tort system, not for any one of  
19 their individual client but comprehensively an overall.

20 If I could, you had asked about the stay before, as  
21 well. And I'd also point you to I think the language of  
22 362(a)(3) and this Court's decision in McCartney, which I think  
23 as Judge Kaplan found was square precedent in saying --

24 THE COURT: How many of the 670 are J&J entities  
25 besides J&J itself and J&J Consumer?

1 MR. KATYAL: I suspect that most of them are not and  
2 you know -- are not J&J entities. And our point is not to  
3 benefit --

4 THE COURT: Roughly how many are?

5 MR. KATYAL: Your Honor, I haven't looked at those  
6 appendix pages. It would be I think it's Appendix Page 245 to  
7 '50 list all of the protected parties. So I'd point you to  
8 those. I just don't want to characterize them.

9 THE COURT: It's in the hundreds, is it not?

10 MR. KATYAL: I think there's many many other  
11 entities. Our point is this stay is not being done to benefit  
12 them. It's not being done to benefit --

13 THE COURT: Have they been sued in these various 49  
14 actions that have gone to trial so far in the United States or  
15 almost went to trial, I should say?

16 MR. KATYAL: I'm not sure if they were sued in them.  
17 I'm sorry, Your Honor. I don't believe so but I'm not  
18 positive. I think there are litigations against them. And the  
19 purpose that we're seeking for the stay is not to benefit them  
20 or not to benefit J&J. It's rather to hit pause and make sure  
21 that the corpus of funds is not available.

22 And we feel so strongly about this that if we weren't  
23 able to get the 362 or 105 stay, this first question about  
24 financial distress and valid bankruptcy purpose doesn't help  
25 us. The petition is basically meaningless for the reasons

1 Judge Kaplan found. We need that stay because otherwise  
2 plaintiffs will sue for these very same claims. They'll sue  
3 some other entity, and that will hurt us in forms of the  
4 indemnification.

5 THE COURT: But if it's not Johnson & Johnson or  
6 Johnson & Johnson Consumer, which have been involved in  
7 connection with this process, how could they possibly win  
8 against Johnson & Johnson, you know, Floor Covering or  
9 whatever?

10 MR. KATYAL: They'll be indemnified. So whoever the  
11 entity is that's sued, they'll be indemnified, they'll share  
12 insurance policies.

13 THE COURT: But the point being that the suit's not  
14 going to win against them. I mean Johnson & Johnson was the  
15 one involved until 1979 with the talc products. Then it was  
16 Baby Products which later became Consumer, and now it's LTL.

17 These other entities in the hundreds, what I don't  
18 understand is why this stay is so broad.

19 MR. KATYAL: Because those are, and Judge Kaplan  
20 looked at the claims, the same claims. It's just a different  
21 place in the supply chain. And it's pretty common in these  
22 mass tort cases to sue, you know, everyone in the chain, the  
23 insurer, the retailer, and the manufacturer.

24 And to be sure, we think at least with respect to  
25 suits against J&J, they wouldn't have viability. But as Judge

1 Kaplan also found, you know, even a very low success rate is  
2 enough to create financial distress.

3 THE COURT: That's because of the indemnification  
4 agreements, correct? It would bleed --

5 MR. KATYAL: The indemnification, insurance.

6 THE COURT: It would bleed the fund.

7 MR. KATYAL: Exactly. It would bleed the fund.  
8 Exactly.

9 And, again, with a 75 percent threshold that we have  
10 to meet in order to confirm a plan, you know, if the fund is  
11 bled and insurance proceeds are dropped or things like that,  
12 it's very hard. And then there's also of course the  
13 possibility of record taint, as Judge Kaplan also found.

14 So those are all different reasons why the stay looks  
15 the way it does. And, you know, I understand it's a large  
16 number of parties, but it's a large number of parties for a  
17 very important reason. There's a large amount of litigation in  
18 this space, and 670 is an appropriate amount.

19 Now if you disagree and you're worried about it, as  
20 Judge Kaplan also said, I think it's at A-173, he will have the  
21 parties come back and have to continually justify the breadth  
22 of the stay. And, of course, anyone can come in and try and  
23 lift the stay or something like that.

24 We're incentivized throughout this entire process to  
25 make sure that we move expeditiously and quickly to try and

1 develop a plan that 75 percent of them can agree because  
2 otherwise, as Judge Kaplan has said, he's going to dismiss the  
3 bankruptcy petition. He said it's really important that this  
4 all move incredibly fast, and we are as incentivized as it  
5 comes to make sure of that because otherwise, we're stuck in  
6 the old pre-restructuring world.

7 THE COURT: And the U.S. Trustee is saying with  
8 respect to that, that's a matter for Congress in terms of  
9 picking one system versus the other.

10 MR. KATYAL: Well, we do think Congress has exactly  
11 picked that out in 524(g), Your Honor. And so, you know, to be  
12 sure, if we violated some state law, violated the Texas  
13 divisional merger statute in some way, shape, or form, that's a  
14 problem and Congress would have to fix that by allowing  
15 something.

16 But here, we complied with everything in that  
17 statute. And the Bankruptcy Code takes state law as it finds  
18 it. And we understand that there's a way to abuse the  
19 divisional merger statute. We don't doubt that. It's just  
20 that in this case, we think you should write a limited opinion  
21 just as the bankruptcy court did that says with this funding  
22 agreement, this is a valid purpose and this is an appropriate  
23 amount of parties to be stayed.

24 THE COURT: In connection with the stay, which Judge  
25 Restrepo brought up, an opening question I have is the

1 jurisdiction of the Court, is it a core proceeding, in other  
2 words saying that it's core by virtue of 362(a)(1) dealing with  
3 a debtor or 362(a)(3) dealing with the debtor's property or is  
4 it related to?

5 I have a dumb question. If it's just related to and,  
6 therefore, non-core, doesn't a bankruptcy judge have to go to  
7 the district court with a report and recommendation and have  
8 the district court sign off?

9 MR. KATYAL: I'm always scared, Your Honor, when you  
10 ask a dumb bankruptcy question. I'm starting to get worried,  
11 but I think the answer --

12 THE COURT: I've said to a couple of people this is a  
13 dumb question, but --

14 MR. KATYAL: No, I think the answer is --

15 THE COURT: -- if it's related to --

16 MR. KATYAL: -- I think you have it exactly right  
17 that it is something that the district court would have to  
18 approve if it's related-to jurisdiction. Of course, here, it's  
19 362 that we're placing predominant emphasis on and also the  
20 other parts of 105 under arising-in and arising-under.

21 And if I could walk you through that. So for  
22 362(a)(1), there are two different theories the bankruptcy  
23 court found. One is that this is -- these are lawsuits that  
24 are virtually against the debtor. And so he said it fits under  
25 the very first clause of a proceeding against the debtor.

1 And then he also said it's, quote, a claim against  
2 the debtor under the second part of 362(a)(1). We think the  
3 second part is the right way to think about this, that these  
4 lawsuits are in effect for reasons that Your Honor mentioned  
5 before effectively against the debtor, and it's a claim against  
6 them.

7 And as the Second Circuit said in Colonial Realty,  
8 that second part of (a)(1) has to have some meaning. It can't  
9 just literally be suits against the debtor. It includes third  
10 parties. At least here where the third-party lawsuits involve  
11 the same basic claims during the same time period.

12 And then there are questions about 105 and arising-in  
13 and arising-under. And we think there that, you know, the  
14 automatic stay is --

15 THE COURT: Well, arising-in and arising -- it's hard  
16 for me to say 105's arising-in or arising-under. Arising-under  
17 means it's explicitly given to you in the Code. Arising-under  
18 means it comes to you as a result of something else that's in  
19 the Code. 105 is sort of one of these things that implement  
20 something that otherwise may be given to you. It's --

21 MR. KATYAL: But I think here the theory is, and many  
22 courts have done it, including the court below, is to say that  
23 362 is the thing given to you in the Code, the automatic stay.

24 THE COURT: As for the debtor.

25 MR. KATYAL: Exactly.

1 And then as -- in order to safeguard the vitality of  
2 that and to make that process work, you need a stay against  
3 others, not that the Court will adjudicate on the merits, of  
4 course, those other cases. It's just a temporary pause under  
5 362 and 105 to make that process work.

6 THE COURT: My perception based on a lot of anecdotes  
7 over the course of years is that most courts just say, okay,  
8 we're going to be practical about this, we're going to put this  
9 in play and go from there. Basically it's a pause, we need  
10 this pause in order for people to negotiate on and on and on.  
11 And --

12 MR. KATYAL: And we don't --

13 THE COURT: And they glide over some of the  
14 jurisdictional issues.

15 MR. KATYAL: Yes. I certainly think that's happened.  
16 But I do think like the court in McCartney really did, I think,  
17 you know, go into some of those jurisdictional issues. And of  
18 course A.H. Robins in the Fourth Circuit really in detail tried  
19 to flesh out these different points.

20 But, Your Honor, absolutely, to the extent this Court  
21 I worried about the breadth of this stay, if you don't think  
22 it's surgical, we obviously do, but the remedy for that is that  
23 very practical one which Judge Kaplan has already said he will  
24 do, which is to make sure and police this stay for the  
25 protected parties to make sure it is the same claims and that

1 it is justified.

2           Were not here to try and just stop litigation for its  
3 own sake. We're doing it in order to protect the integrity of  
4 the process. And as I say, it's so important to us. The  
5 entire first question is just not helpful to us unless we have  
6 this stay in place.

7           THE COURT: You have about -- since you don't get  
8 rebuttal, as the appellee, I'm going to give you a chance to do  
9 some summing up.

10           MR. KATYAL: Great.

11           And if I could, there's just one -- I want to respond  
12 to one other thing my friend said on the other side --

13           THE COURT: Go right ahead.

14           MR. KATYAL: -- which is that JJCI could be spun off,  
15 he said, under this and that that will be problematic. But the  
16 funding agreement itself says that if there is a spinoff,  
17 Paragraph 4(b) of this and this is Appendix Page 4239, says  
18 that itself will be considered part of the fair market value.

19           So, again, this is an agreement that increases in  
20 value over time as JJCI increases in value. The claimants get  
21 the upside of all of it. And if they're -- to the extent  
22 they're concerned whether it's distributions or spinoffs, the  
23 agreements itself polices those things.

24           And we're asking you here, Your Honor, for a limited  
25 ruling to affirm Judge Kaplan based on his factual findings.

1 We know this is a painful case. We know this is hard for  
2 everyone involved. But Judge Kaplan in the very last page of  
3 his second opinion, he said, you know, delay is something that  
4 he thinks about all the time as the claimants die.

5 And the best way, the most efficient way to actually  
6 provide claimants with relief, both present and future, in an  
7 even-handed equitable way that avoids the deadweight losses of  
8 millions and millions of dollars being given to lawyers is  
9 through this solution.

10 And if you're worried about whether it's fair or not,  
11 they have remedies, the 75 percent vote, the two-court review  
12 vote. And that's why we think Judge Kaplan got it right.

13 THE COURT: Thank you.

14 MR. KATYAL: Thank you.

15 THE COURT: What we will do is we'll take about a  
16 five-minute break and we'll come back -- well, let's see.  
17 We'll come back at 4:30 and be out of here at 5.

18 (Recess)

19 THE CLERK: All rise.

20 THE COURT: Thank you.

21 We'll have rebuttal. Mr. Lamken?

22 Can I ask you one of the things, and maybe you're not  
23 the one to deal with it but if not maybe Mr. Frederick can.  
24 How are you going to deal with the future claimants? How do  
25 you propose that be done?

1 MR. LAMKEN: So, Your Honor, I think that for future  
2 claimants, that doesn't tell us what an answer to my  
3 fundamental pitch which is it doesn't tell us whether you  
4 should have JJCI in bankruptcy or you should have LTL --

5 THE COURT: I agree. I agree. But the point is that  
6 if you don't have a bankruptcy, you're going to have an MDL  
7 process. And in an MDL process, how do you make sure that  
8 future claimants are dealt with fairly?

9 MR. LAMKEN: Right. And I think in cases like the  
10 diet drug cases, they did actually come up with a mechanism to  
11 deal with future claimants because those cases also have a  
12 tail. There are ways of appointing people in order to  
13 represent future claimants and come up with a structured  
14 settlement that will handle it consistent with due process.

15 But until we actually have a valid bankruptcy, we  
16 don't have a way of dealing with future claimants in  
17 bankruptcy. And I think that's really where I want to start  
18 with is, look, the difficulty here is we don't have a good-  
19 faith bankruptcy in the first place because the whole thing is  
20 structured to evade bankruptcy's principles.

21 THE COURT: So if we undo the bankruptcy, what  
22 happens? How does this case go forward?

23 MR. LAMKEN: There's two options there. One would be  
24 that J&J may decide we're going to put Old JJCI in bankruptcy.  
25 And then we actually have just like Johns-Manville, just like

1 every other bankruptcy in history --

2 THE COURT: But how does that advance the ball for  
3 your client?

4 MR. LAMKEN: Well, it advances the ball in multiple  
5 ways. First, when it comes to the priority rules, it means  
6 that equity doesn't get paid ahead of creditor here. It means  
7 that we don't sit in bankruptcy literally dying while billions  
8 of dollar go out to equityholders --

9 THE COURT: But doesn't the funding agreement address  
10 that concern?

11 MR. LAMKEN: Actually, it doesn't. The funding  
12 agreement will increase the amount that's available to the  
13 amount that's paid to equity. But the absolute priority rule  
14 doesn't say go ahead and pay equity as long as you have an  
15 unsecured promise to pay an equal amount to creditors later on.

16 The absolute priority rule says until you have  
17 satisfied your creditors, you don't give anything to equity, at  
18 least not without their consent 75 percent and the court  
19 approval. And that is one of the reasons why it just  
20 fundamentally undermines the incentives here because J&J can  
21 operate its businesses as before including all the assets of  
22 Old JJCI outside bankruptcy without bankruptcy court  
23 supervision paying equity, paying other creditors while one  
24 category of creditors sits in bankruptcy.

25 And I think that's the critical thing is that you've

1 actually taken one set of creditors, injured talc victims, and  
2 put them in bankruptcy alone. Trade creditors get paid ahead  
3 of us. We're behind, and that is a fundamental distortion of  
4 the bankruptcy process.

5 Since history, the way to do it is to just simply  
6 take your bankrupt company if you're financially distressed and  
7 put that company in bankruptcy. And I think the problem is  
8 that --

9 THE COURT: But their point is that no claimant with  
10 a valid claim fairly estimated is going to be out a dollar.  
11 Now there may be a significant delay if there is an appeal, but  
12 in the end, that full claim will be paid.

13 MR. LAMKEN: Your Honor, first, I don't think the  
14 Bankruptcy Code says you may follow my principles unless you  
15 give us an unsecured funding agreement that eventually may pay  
16 everybody. The Bankruptcy Code has structures that are meant  
17 to be followed. And if you've created your structure in order  
18 to evade those bankruptcy --

19 THE COURT: I think what they're saying is that this  
20 is a case that's *sui generis*. We're not talking about the next  
21 case. We're saying that with this, you are never or perhaps  
22 almost never ever going to get this kind of backstop again.

23 MR. LAMKEN: Not only that, Your Honor, but if this  
24 goes forward, if J&J can do this, this is actually the model  
25 for the future. Who wouldn't do a build-your-own bankruptcy

1 where you choose, okay, which creditors I'm going to keep  
2 outside of bankruptcy and pay them right away, which creditors  
3 I'm going to put in bankruptcy and make them way, which assets  
4 am I going to put outside bankruptcy and which assets will I  
5 put in bankruptcy or will I just put an unsecured funding  
6 agreement subject to defenses like if you fail to indemnify me,  
7 I can stop paying the funding.

8 Those are dramatically different things and with  
9 bankruptcy --

10 THE COURT: But I think what they're saying is that  
11 or the response to that would be, okay, the creditors that we  
12 paid before were because we hadn't gone into bankruptcy yet.  
13 Once we've gone into bankruptcy, those creditors, those  
14 claimants are all going to be treated in a way in which there  
15 won't be as many strikeouts as there might otherwise be if  
16 there were litigation.

17 MR. LAMKEN: So, Your Honor, to the extent that  
18 sometimes people prevail before juries and sometimes they  
19 don't, that's a function of the system that the framers  
20 established 200 years ago or we entrust the common man, 12 of  
21 them, to make these determinations and to find facts and make  
22 determinations.

23 The notion that, well, bankruptcy might actually sort  
24 of even out the balance isn't a way of indicting the tort  
25 system that 50 states have operated to compensate victims for

1 200 years. But even setting that aside, that still doesn't  
2 answer the question of why LTL as opposed to JJCI? Why not  
3 take the company that was the tortfeasor that supposedly was in  
4 financial distress and put it and its assets into bankruptcy to  
5 satisfy the way it's done it before?

6 And what we were told here is, well, the bankruptcy  
7 court looked at that and the bankruptcy court said, gee, that's  
8 going to be very costly. And I think the -- actually the court  
9 said it's too much value to waste. But when it comes to the  
10 Bankruptcy Code, it's not a waste to enforce the absolute  
11 priority rule so that people don't pay equity ahead of  
12 creditors.

13 It's not a waste to --

14 THE COURT: To further round that, I mean maybe it  
15 was just an offhand comment that Mr. Katyal made, but -- and  
16 I'm going to add on to it. Almost every right that's given to  
17 a creditor in bankruptcy likes who is secured, who's not, is  
18 something that's outside bankruptcy. Non-bankruptcy law tells  
19 you who has these particular rights inside of a bankruptcy.  
20 And that's basically following the Butner case from '79.

21 Transpose that to the corporate area that corporate  
22 law is not affected by the bankruptcy. And corporate law  
23 allows for a divisional merger. And if corporate law allows  
24 that so all that we are dealing, as you say, is just LTL  
25 itself, why is LTL not in some type of financial distress if

1 that's the only one we're looking to and luckily has somebody  
2 who's willing to come to its -- meet all of its funding needs  
3 with respect to the future of the bankruptcy?

4 MR. LAMKEN: So, Judge Ambro, I think from the outset  
5 when we say we take the a debtor as we find them, when you're  
6 describing, when deciding good faith, under cases like the new  
7 debtor syndrome cases, courts ask who's my debtor, where did it  
8 come from, and why is he here.

9 And the answer to those questions here is whose my  
10 debtor, it's an artificial entity created for bankruptcy; why  
11 is he here, he's here so talc claimants will be in a single  
12 class by themselves in bankruptcy and everybody else is outside  
13 bankruptcy; why is he here, he's here so that JJCI's assets,  
14 its operating business is outside bankruptcy beyond the  
15 bankruptcy court's reach.

16 And only, only an unsecured funding agreement subject  
17 to defenses is available to talc claimants. That means that,  
18 you know, you don't just accept them as they find them when you  
19 have that sort of a purpose. And I think, Judge Ambro, that  
20 actually distinguishes the Chapter 11 rundown cases you  
21 described.

22 When you have a Chapter 11 rundown case as I  
23 understand it, Goodco and Badco are both in the bankruptcy,  
24 both subject to the court's supervision. This is the exact  
25 opposite. One company is in bankruptcy subject to the court

1 bankruptcy -- the bankruptcy court's jurisdiction. But  
2 everything else that happens, all of Old JJCI's assets as  
3 they're operated, this spinoff, everything else that happens --

4 THE COURT: What provisions of the Code if Old JJCI  
5 were in bankruptcy, what provisions of the Code do you think  
6 would apply that you would want to take into account with  
7 respect to Old JJCI?

8 MR. LAMKEN: So the absolute priority to begin with,  
9 which is not a specific provision of the Code, but it's an  
10 inflection from history and the structure of the Code where you  
11 don't pay creditors, you don't pay equity ahead of creditors.

12 And that puts a lot of pressure on people to come up  
13 with a good plan to the benefit of the creditors and not do  
14 what Bestwall is doing now and let things go for five years as  
15 people are rapidly failing.

16 The second one would be --

17 THE COURT: And I should have asked this before.  
18 Spin out the absolute priority concept here. This is not like  
19 SGL where they're going to do a state court -- or a state  
20 dissolution and have all the money go to equity after the  
21 bankruptcy.

22 What monies are going to equity during the course of  
23 this bankruptcy? Are you saying dividends? Is that what  
24 you're talking about?

25 MR. LAMKEN: Yeah, well, there's dividends and

1 there's also \$5 billion for a spinoff that was announced or \$5  
2 billion for a stock buyback that was announced last week.

3 So -- and the fact that you can continuously in  
4 bankruptcy pay equity means that there's far less pressure to  
5 actually achieve a plan that the creditors can live with. You  
6 can wait longer and longer just as Bestwall did.

7 But I'd also point to Section 363 which is your non  
8 --

9 THE COURT: Wait, you say stock buyback. The stock  
10 buyback is not for LTL. The stock buyback is for Old JJCI.

11 MR. LAMKEN: Exactly.

12 And the divisional merger was structured and the  
13 funding agreement is structured specifically to allow J&J to  
14 spinoff assets without anybody, any of our creditors, being  
15 able to do what they would be able to do under Section 363, if  
16 you had put the actual tortfeasor, the people funding this,  
17 JJCI -- Old JJCI into bankruptcy, which would be they get  
18 notice and an opportunity to be heard.

19 And the bankruptcy court would be able to supervise  
20 it and to make sure that those assets are indeed available to  
21 the creditors at the end of the day. None of that, none of  
22 that exists because instead of doing what one does ordinarily  
23 and putting a bankruptcy -- the whole entity into bankruptcy,  
24 they've simply hived off one set of claims, put them into  
25 bankruptcy and taken all the assets, all the operating things

1 and all the famous brans and operate them outside of  
2 bankruptcy.

3 And just I think the key thing here is Jevec makes it  
4 clear from the Supreme Court that it's just not permissible to  
5 say I have provided something that I think is better for the  
6 creditors. When you're talking about bankruptcy, the specific  
7 provisions of the Code are important. And the Code here  
8 ordinarily requires absolute priority rule, Section 363  
9 supervision of spinoffs and other non-ordinary course  
10 transactions.

11 And even 524(g) requires that you put in equity  
12 securities, securities of the debtor, with a right to  
13 dividends. But we have now swapped out one debtor, a valuable  
14 business JJCI with famous brands, for a completely different  
15 debtor which is LTL.

16 And I'd like to sort of turn if I could for a moment  
17 to the injunction. And I think the serious problem with the  
18 injunction is this. Section 105 simply doesn't say you can  
19 reach out to non-debtors, 670 of them, and enjoin them on the  
20 basis of, well, gee, I think it has some relationship to the  
21 estate. You actually have to have a clear right to relief.

22 The problem --

23 THE COURT: What you're saying is that there's not an  
24 identity of interest other than the fact that it has the same  
25 corporate parent?

1 MR. LAMKEN: Exactly, Your Honor.

2 In fact, the record is very clear that you can't do  
3 this here because J&J has its own independent liability for its  
4 own tortuous misconduct. For example, in Ingham, as we've  
5 mentioned, J&J had a higher multiple on punitive damages  
6 because.

7 And I'll quote:

8 "Because defendants decision to chart their course of  
9 reprehensible conduct began long before JJCI was spun  
10 off as a separate entity. J&J made all the health  
11 and safety decisions. It ignored its own scientists  
12 for decades on end. And actually, it worked  
13 tirelessly to make sure that industry standards would  
14 not change to make asbestos that's otherwise  
15 undetectable detectable."

16 That's on Pages 716 to 717 of Ingham and Pages 5841  
17 to 592. And it personally individually told -- falsely  
18 advertised that baby powder does not contain asbestos and never  
19 will and that it tested every lot to make sure.

20 And juries have repeatedly found J&J liable  
21 separately from JJCI. This is not a case of derivative  
22 liability. It is an instance of independent liability. For  
23 example, Echeverria in California, 97.8 percent of the  
24 liability was given to J&J, not JJCI.

25 If you look at Page -- the verdict sheets on Page

1 4532, 4592, and there's a summary at 4704 and 4627. They are  
2 regularly giving more liability to J&J than JJCI, This is not  
3 a case of derivative liability where J&J because it's the  
4 corporate parent has some liability. This is J&J's own  
5 misconduct. And when one is going to enjoin that type of  
6 liability, you need more than what the Court came up with here.

7           For example, and even 524(g) if you want a channeling  
8 injunction, it says the channeling injunction and Combustion  
9 Engineering addresses this specific issue. 524(g) says when  
10 you have a channeling injunction, it applies only to the  
11 debtor, and you couldn't go beyond the debtor when the  
12 liability is derivative because it comes from those corporate  
13 relationships.

14           But the liability here isn't from corporate  
15 relationships. It's liability for J&J's own misconduct. And  
16 so you couldn't get a channeling injunction under 524(g) for  
17 the liability of J&J. Why under 105 on a preliminary basis are  
18 you going to give that injunction and prevent talc claimants  
19 from actually getting satisfaction when waiting for the  
20 possibility of a 524(g) plan? It simply doesn't make sense.  
21 It takes those statutory provisions and it sets them on their  
22 heads.

23           And the net result is there's simply no ability of  
24 tort claimants to come forward and have any ability to pursue a  
25 reasonable plan here because they're frozen in their tracks.

1 J&J, it's got all the liability against it frozen. 650 other  
2 people, that's frozen. LTL, our made for bankruptcy debtor,  
3 frozen, as well.

4 What is the leverage they have? Nothing. It simply  
5 shuts everything down. And you can't do that under 105. You  
6 can't do that under 362(a) when it is its own independent  
7 liability. And there's a key provision here that I don't --  
8 key finding by the district court that I don't think I heard  
9 Mr. Katyal mention, and it is this.

10 The district court found, and this is again 159,  
11 that the shared identities of interest were based on allocation  
12 of agreements to the debtor -- that means indemnification  
13 agreements that they had often gave to the debtor -- shared  
14 insurance agreements that they gave off the debtor on the eve  
15 of bankruptcy, quote, for the very purpose of extending the  
16 stay.

17 That is an effort to create equity through agreements  
18 on the eve of bankruptcy. And that doesn't work for two  
19 reasons. One is combustion engineering saying you can't buy  
20 agreement establish jurisdiction. But it also doesn't work as  
21 a matter of equity. As a matter of equity, two parties can't  
22 enter into a contrivance and agreement on the even of  
23 bankruptcy and say, aha, we now have a right to injure third  
24 parties and prevent them from pursuing other parties that have  
25 their own independent liability.

1           Ultimately, the problem here is that J&J decided to  
2 take a corporate shell, LTL, and put it into bankruptcy. But  
3 then it turns around and says now that we've put this corporate  
4 shell into bankruptcy, we want an injunction that protects not  
5 just the corporate shell, it protects us from our own  
6 independent liability, that protects retailers from their own  
7 independent liability, that protects everybody from their own  
8 independent liability.

9           But that's completely topsy-turvy. If we're going to  
10 accept putting LTL in bankruptcy, the automatic stay and any  
11 possible standard 105 would extend to just LTL. It wouldn't  
12 extend to everybody else. But we really shouldn't be saying  
13 we're going to accept LTL as our debtor here because of the  
14 very purpose of putting LTL into bankruptcy was to make sure  
15 that talc claimants were treated differently or -- treated  
16 differently.

17           I know one of the questions that came up here was,  
18 well, how do we determine, what if it was, you know, 1994 when  
19 they did the divisional merger or what happens if it was 1979.  
20 And I think the short answer is two-fold. One is in this case,  
21 it was two days before bankruptcy. In this case we know  
22 exactly why it was done. It was done to manipulate the  
23 bankruptcy. It was done to make sure that it was structured in  
24 a way where JJCI would be out of bankruptcy and -- or its  
25 assets would be out of bankruptcy and only talc claimants would

1 be in bankruptcy.

2 And that provides a very clear answer alone. So it's  
3 not just a matter of time; it's a matter of what the purpose  
4 was. If we look back and we have a non-bankruptcy purpose for  
5 years on end that says, yeah, we've established this as a  
6 meaningful way, we've not only given liabilities, we've  
7 actually given them a business and they're operating that  
8 business for years and they're building up assets and goodwill.  
9 And it's a real company that's operating.

10 That's a very different scenario from saying we've  
11 now created a company solely for the purpose of bankruptcy.  
12 We've given it all the liabilities for just one set of  
13 claimants, and we've done it for the purpose of keeping certain  
14 assets out of bankruptcy so we continue to pay dividends,  
15 continue to operate the brands, and continue to do so without  
16 the bankruptcy court supervision that would otherwise be --

17 THE COURT: Indeed, what you just said, that's your  
18 principle theme, isn't it?

19 MR. LAMKEN: That is my principle theme, Your Honor.  
20 I think that really sums up the problem here. I think -- and,  
21 in addition, I think I should also stress in the end, it can't  
22 be both it's all right to put LTL in bankruptcy and then to  
23 extend the injunction to everybody else. Be definition, you  
24 just end up going way beyond all party -- the parties specified  
25 by 362 --

1 THE COURT: Yeah.

2 MR. LAMKEN: -- the norm under 105. You understand.

3 THE COURT: Thank you.

4 MR. LAMKEN: Thank you, Your Honor. I appreciate  
5 that. If there's no further questions, thank you, Your Honor.

6 THE COURT: No further questions.

7 I know Mr. Frederick reserved some time.

8 Mr. Janda, did you have anything further to say?

9 MR. JANDA: I did not reserve any time, Your Honor.  
10 But if you would like to hear from me?

11 THE COURT: Yeah, I'll give you two minutes. Do you  
12 want two minutes? It's your call.

13 MR. JANDA: Thank you, Your Honor.

14 Just three points I'd like to make real quick.

15 So first is, you know, we've heard a lot of talk  
16 today about what system, tort system or the MDL system or the  
17 bankruptcy system, is better for which set of parties, current  
18 claimants, future claimants, defendants.

19 And I think the point here is just that there's a  
20 very complicated admittedly balancing of interests of trying to  
21 get claims resolved efficiently, to get claims resolved  
22 correctly, to get claims resolved equitably, and to ensure that  
23 people are able to exercise the rights that they have, their  
24 constitutional rights, their due process rights, their jury  
25 trial rights.

1 And that complicated balancing of interests has been  
2 done by Congress. Congress has enacted a number of different  
3 aggregation mechanisms and has enacted the Bankruptcy Code.  
4 But the Bankruptcy Code Congress has enacted and provides  
5 strong tools to defendants only in a limited set of  
6 circumstances as this Court said in both Strong Tools and Vike  
7 Abuse (phonetic). And it's really up to the courts to police  
8 the boundaries of that system to ensure that it's not being  
9 used for reasons that Congress didn't intend it be used.

10 And I don't think 524(g) changes the analysis in any  
11 way. 524(g) pre-supposes you have a valid bankruptcy and  
12 Congress has determined that 524(g) provides an appropriate  
13 tool in bankruptcy once you have a bankruptcy to make sort of  
14 the best of a bad situation. But I don't think you can sort of  
15 bootstrap your way into bankruptcy to try and take advantage of  
16 the tool that pre-supposes the valid bankruptcy in the first  
17 place.

18 Second, just very quickly on financial distress, I  
19 heard my friend on the other side say two things that I think  
20 together could resolve this case on their own. I mean one is  
21 that he says LTL is the appropriate entity and, two, is that in  
22 his view or in LTL's view, the total legitimate value of all of  
23 the current and future tort claims against it is less than \$61  
24 billion which he has access to under the funding agreement.

25 You put those two things together and I don't see how

1 you can make any argument that there is a legitimate financial  
2 distress here on the part of the debtor that justifies invoking  
3 bankruptcy maybe ever and certainly not at this point.

4 And then, third, just very briefly, you know, as we  
5 said, bankruptcy provides a lot of tools. It's a very strong  
6 medicine. It curtails creditors' rights in significant ways  
7 including allowing debtors to bind non-consenting creditors,  
8 possibly many non-consenting creditors to one particular  
9 resolution.

10 And that is appropriate when you have a debtor facing  
11 financial distress that needs that time to reorganize its  
12 affairs or to pursue an orderly liquidation. But it's not  
13 appropriate every time you just have a lot of tort claims  
14 against an entity when those pre-conditions aren't met. And  
15 that's just the case here.

16 THE COURT: Thank you very much.

17 MR. JANDA: Thank you, Your Honor.

18 THE COURT: Mr. Frederick, I know you reserved three  
19 minutes. We'll give you five. Since you're batting clean-up.

20 MR. FREDERICK: Thank you very much, Your Honors.

21 I want to start with the trilogy of Third Circuit  
22 cases because the main point made on the other side was that  
23 they didn't confront mass torts. But the SGL Carbon case in  
24 announcing why the good-faith standard was so important had an  
25 extensive discussion of Johns-Manville.

1 And the point that it was making was that Johns-  
2 Manville had tried for many many years to pay off claimants and  
3 until it got to a point where it did face imminent financial  
4 distress because --

5 THE COURT: There was no doubt that Johns-Manville  
6 was in financial distress.

7 MR. FREDERICK: And the question here is, is LTL in  
8 financial distress.

9 Now you can either take the fundamental contradiction  
10 of their position which is the funding agreement will fund  
11 everything in which case LTL is not in financial distress or  
12 the funding agreement depends on Johnson & Johnson and JJCI, in  
13 which case this is not a proper bankruptcy purpose because  
14 those two entities are not in the bankruptcy.

15 Either way, that contradiction should end the case on  
16 as a matter of good faith and the Court need not go further in  
17 order to decide how far it needs to go.

18 Now the point is made that after Ingham, it's  
19 impossible to settle these cases. Our expert said 98 percent  
20 of asbestos cases settle or dismiss. The bankruptcy law  
21 professors who provided an amicus brief on their side said 97  
22 percent of MDL cases settle or dismiss. Common sense tells you  
23 that you don't have to litigate all 38,000 to judgment. We  
24 weren't born yesterday. And that point made by the bankruptcy  
25 court is on its face not credible and is subject to plenary

1 review by this Court.

2 Now the main argument that they make for financial  
3 distress is based on the speculation that they're going to have  
4 to pay out many many tens of billions of dollars. But SGL  
5 Carbon says you don't look at speculation for future. You look  
6 at what is imminently before you. Do you have a present  
7 inability to meet present financial obligations?

8 And here, LTL unquestionably did that two days after  
9 it was created. There's no serious issue at the moment it had  
10 filed its bankruptcy it was not facing financial distress.  
11 Importantly, Mr. Katyal did not deny that not a dime gets paid  
12 until the last appeal of the last objector has been resolved.  
13 And we know from judgments and settlements in the civil system  
14 that money has flowed.

15 Johnson & Johnson shouldn't be permitted to stop that  
16 process. But the spinoff of JJCI which is permitted, and he  
17 acknowledges, under the financing agreement is what creates the  
18 cap. As soon as that cap is done, there is no greater value  
19 that can be done. And for that reason, their plan is not  
20 consistent with the statute 524(g) that says you have to have  
21 an evergreen source of continually growing assets and money to  
22 pay the future claimants. This plan undisputably does not do  
23 that.

24 Now he takes me to task for saying that Ingham was  
25 paid by Johnson & Johnson. Look at the Appendix Page 6379. It

1 was paid out of a central account. He eventually acknowledges  
2 that. The point is Johnson & Johnson charged back to JJCI as  
3 an accounting matter.

4 Now this wouldn't be -- this might be important if  
5 JJCI had its own independent shareholders. It is a wholly  
6 owned subsidiary of Johnson & Johnson. But Johnson & Johnson  
7 wanted to be able to say that it's continuing streak of paying  
8 higher dividends year after year has continued, so it fobbed  
9 off the accounting deficit to JJCI. I don't know why that  
10 should warrant good faith in a bankruptcy.

11 Now he says that there are real limiting principles  
12 here based on the facts. He talks about the latency. That's  
13 true for all asbestos cases, not just those that are created  
14 out of talc. And it is true of many mass torts, as well. He  
15 says there's lottery-style but that's true in any case where  
16 there are really good lawyers who know how to try cases and  
17 there are really bad lawyers who don't know how to try cases  
18 and you have the special problem of specific causation, which  
19 is an evident problem and issue in establishing the legitimacy  
20 of any person's claim.

21 Their fundamental problem with their 524(g) is that  
22 they don't create an evergreen funding mechanism. And when he  
23 talks about the 79 transfer of liability, he doesn't respond  
24 that J&J itself was engaged in reprehensible conduct for which  
25 people have found them to be liable.

1 Now the last point I'd like to make is that Johnson &  
2 Johnson did not go to all of this trouble in order to pay  
3 claimants more money. They went to this trouble to pay  
4 claimants less money more slowly. The civil system is designed  
5 with whatever flaws that it has to promptly move along cases  
6 and not to stop and stay all action.

7 This particular bankruptcy is intended to benefit  
8 non-debtor affiliates. It is a litigation tactic to stop civil  
9 litigation. And there is no increase in value to the  
10 creditors, the tort claimants. And for all of those reasons,  
11 we urge you to reverse the bankruptcy court.

12 THE COURT: Thank you very very much.

13 I would ask that a transcript be prepared of this  
14 oral argument and just split the costs half this side, half  
15 that side.

16 And I would also like to thank counsel for extremely  
17 well presented arguments not only today but in your briefing  
18 and also I should broaden that to thank those who took time to  
19 write the amicus briefs, very helpful on both sides. And we'll  
20 take the matter under advisement.

21 Thank you. It's a privilege having you here.

22 MR. FREDERICK: Thank you.

23 THE CLERK: All rise. Court is adjourned until  
24 tomorrow at 9:30 a.m.

25 (Proceedings concluded at 2:21 p.m.)
